1. Place two (2) carriage bolts through the bottom of the roof rack clip. Slide the roof rack clip with the carriage bolts installed over each stud on the top of the roof.
2. Place a rubber strip on either side of the roof rack clip.
3. Place a mounting bracket over each of the roof rack clips being sure that the carriage bolts are inserted

through the two (2) pre-drilled holes in the mounting bracket.

4. Set the roof rack onto the mounting brackets being sure the carriage bolts are inserted through the welded-on mounting pads on the roof rack (reference Figure 1).

5. Use the slots withing the roof rack clip and the weld-on mounting pads to adjust the roof rack into the desired position.
6. Once the roof rack is in the desired position, tighten the 5/16" hardware down.

**NOTE:** Do not over-tighten the hardware. If the roof rack begins to deform into a "U", then the bolts are too tight!

7. Your roof rack is now installed. Check all fasteners for fitment after 50 miles of driving, and periodically thereafter. Enjoy!
