**Installation Instructions:**

**NOTE:** YOU ONLY NEED ONE LEVELER PER AXLE ON ONE SIDE OF THE TRAILER. You do not need to level both sides of the trailer, only put them on the low side.

1. Push the thin end of the leveler under the tire either in front or behind depending on if backing up or pulling forward. Ensure the leveler is tightly wedged between the wheel and grip mat.  
**Note:** If using multiple levelers, all levelers should be facing the same direction.
2. Slowly drive or back trailer onto leveler until the camper reaches the desired level.  
**Note:** Recommend using a bubble level to determine that the trailer is level.
3. Slide chock as far as possible under the leveler. Ensure the grooves on the chock lock into place with the grooves on the leveler.

**Tip:** Set-up works best with two people, one driving the vehicle and a second guiding the driver and watching the bubble level.

**Removal Instructions:**

1. Slide chock out from under leveler.
2. Drive off of leveler in the opposite direction it was installed and remove.
4. Store kit in a safe place.
