## *Product Instructions*

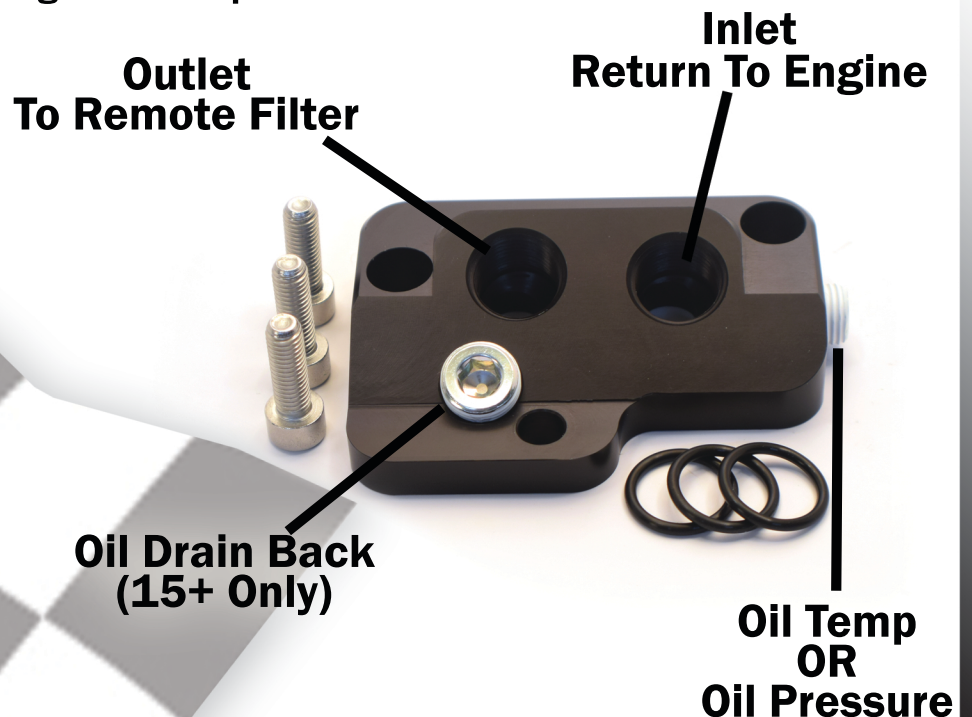

### #22-627 Ford Coyote Remote Adapter

This adapter features (2) 1/2" NPT ports for the inlet and outlet. Also included are a 1/4" NPT port for an oil temp or pressure sensor and a 3/8" NPT port for oil drain back. NOTE: The oil drain back only works with the GEN 2 (15+) Coyote motors.

In the event you are not using the extra oiling ports be sure to block off the 2 ports with the provided plugs. These plugs will require teflon tape to properly seal.

This adapter takes the place of the stock oil filter plate on the Ford Coyote motor. To remove the stock plate remove the mounting bolts. NOTE: The first gen (11'-14') Coyote oil filter mounts will have 4 bolts. The second gen (15'+) will only have 3.

After removing the adapter bolt the new Canton Remote Filter Mount in place. Be sure that the O-rings are seated properly. NOTE: It may be easiest to install the 1/2" NPT fittings before bolting in the adapter.
