LOCKING TIE INSTALLATION INSTRUCTIONS

Be sure to always wear the proper safety equipment when installing any DEI product. Design Engineering, Inc. WILL NOT BE HELD LIABLE FOR IMPROPER INSTALLATION OR USE OF THIS PRODUCT.

STEP 1: Begin by wrapping tie around what you want to secure, then insert the pointed end into the locking mechanism head end.

STEP 2: Put your thumb or finger on the locking mechanism and push the locking tie through until tight. Be careful as the sides of the metal ties can be sharp. Figure 1 & 2

TIP: You can also use pliers to grasp the end of the tie and pull it through the locking mechanism.

STEP 3: Trim excess tie using side cutters, fold under, and crimp. Figure 3

DEI Locking Tie Tool
also available #10220

- Easily gets ties tight
