

# SPEAKER BAFFLES INSTRUCTIONS

*Tools needed for install: Awl, knife, silicone sealant*

## INSTRUCTIONS:

**1.** *Test fit the speaker into the baffle.*

**2.** *Perforate screw holes using an awl or other pointed tool. Use care not to tear the baffle material.*

**3.** *To install speaker wire it may be necessary to penetrate the baffle housing to route the wire.*

**4.** *Using silicone sealant or similar, seal the opening around the wire to maintain a water tight seal.*

**5.** *Install speaker and baffle assembly as per speaker manufacturer directions.*
