

INSTALLATION INSTRUCTIONS

Part Number E-1946

This filter fits: **See current K&N catalog for current listings**

FREE K&N DECAL** To register your warranty, please see us online at knfilters.com/register. **FREE K&N DECAL

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modifications will be required. However the following procedure **MUST** be followed to ensure a proper fit and seal of the K&N Air Filter.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.

INSTALLATION

- 1) Remove stock filter element from the airbox.
- 2) Using the K&N sealing grease, apply a layer of grease to both top and bottom surfaces of the K&N Air Filter. Apply sealing grease between the two sealing bumps, bringing the sealing grease flush to the top of each bump.
- 3) Install the K&N Air Filter.
- 4) Pay close attention to the orientation of the filter in the housing. The filter will have "TOP REAR" molded into the rubber to aid in orienting the filter in the airbox. The housing will deform the seal slightly after use, so the filter should be installed in the exact same orientation after servicing.
