**1**

**1.)** Insert stud into carburetor.
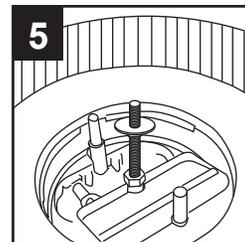

2.) Place filter and filter lid* over the stud and adjust the stud until 3/8" extends above the lid
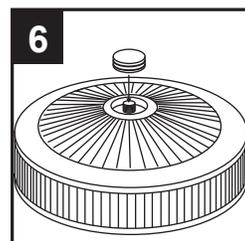

2   3/8"

3.) Remove lid and tighten lower jam nut to tighten stud in place.

4.) Install Nylock nut and tighten it down until the stud extends 5/8" over the top of nut.

5.) Place washer over stud on top of Nylock nut.

3

6.) Install filter and lid over the top of stud*. Tighten filter nut to hold lid in place.

Be sure lid fits fully seated on filter for accurate measurements. Lid was designed to fit snugly to maintain an airtight seal and may require firm pressure to seat properly.

4   5/8"
