K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10-year/Million Mile Limited Warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open glove box and locate the 4 clips on the upper part of the glove box.
2. Pull clips towards you while pulling down the cabin filter housing cover to expose the OE cabin filter.
3. Squeeze the two tabs on the OE cabin filter together and remove the filter.

NOTE: Once OE filter has been removed, clean any dirt or debris that may be present in the cabin filter housing.

4. Install the K&N cabin air filter with K&N logo towards the passenger side door.
5. Once filter is installed, fit the supplied cabin air filter door, making sure it snaps into place.
6. With the K&N® cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
7. Reverse steps 1-2 to complete installation.
