

Product information

Motorbike Air Filter Cleaner

PI 17/28/05/2020

Description

Specially formulated water-miscible air filter cleaning concentrate. Offers outstanding cleaning properties, has high capacity and is economical to use. Gently detaches dust, oil and grease without damaging the foam pores. Solvent-free and biodegradable.

Properties

- excellent cleaning effect
- gentle and rapid cleaning
- economical usage
- does not contain flammable solvents

Technical data

pH value	12,4
Flash point	n.A.
Boiling point	> 212 °F
Fire promoting	nein / no
Base	nichtionische und anionische Tenside / nonionic and anionic surfactants
Solubility in water	mischbar / mixable
Form	flüssig / liquid
Density at 68 °F	1,05 g/ml
Color / appearance	grün / green
Odor	Zitrone / lemon

Areas of application

Suitable for all standard foam air filters in 2 and 4-wheel vehicles.

Application

Place filter in a suitable vessel. Mix cleaner with water. Depending on the degree of contamination, the dosage must be between 1:5 and 1:10 (1 part cleaner to 5 to 10 parts water). Plunge the filter entirely into the cleaning solution and allow to work for 5-10 minutes. Then carefully knead the filter in the solution until it is completely clean both inside and outside. Do not under any circumstances wring the filter out, as this could cause damage. Then rinse the filter out under fresh water until the cleaner has been flushed out completely. If any stubborn contamination remains, repeat the process if necessary. Allow the filter to dry in the ambient air before installation. Then treat with LIQUI MOLY Motorbike Air Filter Oil (item no. 20308).

Comment

Wear suitable gloves (e.g. disposable gloves) when using.
