

## 20038 CENTRAL HYDRAULIC SYSTEM OIL 1L

Liqui Moly GmbH

Chemwatch Hazard Alert Code: 2

Chemwatch: **12-05093** Version No: **2.1.1.1** 

Version No: 2.1.1.1
Safety Data Sheet according to OSHA HazCom Standard (2012) requirements

Issue Date: **09/07/2018** Print Date: **11/07/2018** S.GHS.USA.EN

### **SECTION 1 IDENTIFICATION**

#### **Product Identifier**

Product name	20038 CENTRAL HYDRAULIC SYSTEM OIL 1L				
Synonyms	t Available				
Other means of identification Not Available					

#### Recommended use of the chemical and restrictions on use

Relevant identified uses

Hydraulic oil.

### Name, address, and telephone number of the chemical manufacturer, importer, or other responsible party

Registered company name	Liqui Moly GmbH			
Address	Wieland-Strasse 4 Ulm D-89081 Germany			
Telephone	1420 0			
Fax	731 1420 82			
Website	ot Available			
Email	Not Available			

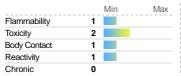

#### **Emergency phone number**

	Association / Organisation	FOTRAC			
En	nergency telephone numbers	300 535 5053 (US & Canada)			
	Other emergency telephone numbers	+1 352 323 3500 (International)			

### **SECTION 2 HAZARD(S) IDENTIFICATION**

### Classification of the substance or mixture

#### CHEMWATCH HAZARD RATINGS

0 = Minimum 1 = Low 2 = Moderate 3 = High 4 = Extreme

Note: The hazard category numbers found in GHS classification in section 2 of this SDSs are NOT to be used to fill in the NFPA 704 diamond. Blue = Health Red = Fire Yellow = Reactivity White = Special (Oxidizer or water reactive substances)

Classification

Acute Toxicity (Inhalation) Category 4, Aspiration Hazard Category 1

#### Label elements

Hazard pictogram(s)

SIGNAL WORD

DANGER

### Hazard statement(s)

nazaru statement(s)			
H332	Harmful if inhaled.		
H304	May be fatal if swallowed and enters airways.		

### Hazard(s) not otherwise specified

Not Applicable

Chemwatch: 12-05093 Page 2 of 10 Issue Date: 09/07/2018

Version No: 2.1.1.1 Print Date: 11/07/2018 20038 CENTRAL HYDRAULIC SYSTEM OIL 1L

### Precautionary statement(s) Prevention

P271	Jse only outdoors or in a well-ventilated area.	
P261	Avoid breathing mist/vapours/spray.	

#### Precautionary statement(s) Response

P301+P310	SWALLOWED: Immediately call a POISON CENTER or doctor/physician.			
P331	induce vomiting.			
P312	l a POISON CENTER or doctor/physician if you feel unwell.			
P304+P340	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.			

### Precautionary statement(s) Storage

P405 Store locked up.

#### Precautionary statement(s) Disposal

Dispose of contents/container in accordance with local regulations.

### **SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS**

### Substances

See section below for composition of Mixtures

#### **Mixtures**

CAS No	%[weight]	Name	
68649-11-6	60-80	0-80 <u>1-decene dimer, hydrogenated</u>	
Not Available	0.1-<1	bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines	
80584-90-3	0.1-<1	diisooctyl aminomethyl tolyltriazole	
128-37-0	0.1-<0.25	2,6-di-tert-butyl-4-methylphenol	
95-38-5	0.01-<0.25	2-(8-heptadecenyl)-4,5-dihydro-1H-imidazole-1-ethanol	

### **SECTION 4 FIRST-AID MEASURES**

### Description of first aid measures

Eye Contact	If this product comes in contact with eyes:  • Wash out immediately with water.  • If irritation continues, seek medical attention.  • Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin Contact	If skin contact occurs:  Immediately remove all contaminated clothing, including footwear.  Flush skin and hair with running water (and soap if available).  Seek medical attention in event of irritation.
Inhalation	<ul> <li>If furnes or combustion products are inhaled remove from contaminated area.</li> <li>Lay patient down. Keep warm and rested.</li> <li>Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures.</li> <li>Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary.</li> <li>Transport to hospital, or doctor.</li> </ul>
Ingestion	<ul> <li>Immediately give a glass of water.</li> <li>First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.</li> <li>If spontaneous vomiting appears imminent or occurs, hold patient's head down, lower than their hips to help avoid possible aspiration of vomitus.</li> </ul>

#### Most important symptoms and effects, both acute and delayed

See Section 11

### Indication of any immediate medical attention and special treatment needed

Any material aspirated during vomiting may produce lung injury. Therefore emesis should not be induced mechanically or pharmacologically. Mechanical means should be used if it is considered necessary to evacuate the stomach contents; these include gastric lavage after endotracheal intubation. If spontaneous vomiting has occurred after ingestion, the patient should be monitored for difficult breathing, as adverse effects of aspiration into the lungs may be delayed up to 48 hours. Treat symptomatically.

### **SECTION 5 FIRE-FIGHTING MEASURES**

#### **Extinguishing media**

- Foam.
- ► Dry chemical powder.
- ▶ BCF (where regulations permit).
- Carbon dioxide.

### Special hazards arising from the substrate or mixture

Chemwatch: 12-05093 Page 3 of 10 Issue Date: 09/07/2018 Version No: 2.1.1.1 Print Date: 11/07/2018

#### 20038 CENTRAL HYDRAULIC SYSTEM OIL 1L

Fire Incompatibility ▶ Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result Special protective equipment and precautions for fire-fighters ▶ Alert Fire Brigade and tell them location and nature of hazard. ▶ Wear full body protective clothing with breathing apparatus. Fire Fighting ▶ Prevent, by any means available, spillage from entering drains or water course. ▶ Use water delivered as a fine spray to control fire and cool adjacent area. Combustible. ▶ Slight fire hazard when exposed to heat or flame. ▶ Heating may cause expansion or decomposition leading to violent rupture of containers. ▶ On combustion, may emit toxic fumes of carbon monoxide (CO). Combustion products include: Fire/Explosion Hazard carbon dioxide (CO2) other pyrolysis products typical of burning organic material. May emit poisonous fumes.

### **SECTION 6 ACCIDENTAL RELEASE MEASURES**

#### Personal precautions, protective equipment and emergency procedures

May emit corrosive fumes.

See section 8

#### **Environmental precautions**

See section 12

### Methods and material for containment and cleaning up

Minor Spills	Slippery when spilt.  Remove all ignition sources.  Clean up all spills immediately.  Avoid breathing vapours and contact with skin and eyes.  Control personal contact with the substance, by using protective equipment.
Major Spills	Slippery when spilt.  Moderate hazard.  Clear area of personnel and move upwind.  Alert Fire Brigade and tell them location and nature of hazard.  Wear breathing apparatus plus protective gloves.

Personal Protective Equipment advice is contained in Section 8 of the SDS.

#### **SECTION 7 HANDLING AND STORAGE**

Precautions for safe handling					
Safe handling	<ul> <li>Electrostatic discharge may be generated during pumping - this may result in fire.</li> <li>Ensure electrical continuity by bonding and grounding (earthing) all equipment.</li> <li>Restrict line velocity during pumping in order to avoid generation of electrostatic discharge (&lt;=1 m/sec until fill pipe submerged to twice its diameter, then &lt;= 7 m/sec).</li> <li>Avoid splash filling.</li> <li>Avoid all personal contact, including inhalation.</li> <li>Wear protective clothing when risk of exposure occurs.</li> <li>Use in a well-ventilated area.</li> <li>Prevent concentration in hollows and sumps.</li> <li>DO NOT allow clothing wet with material to stay in contact with skin</li> </ul>				
Other information	<ul> <li>Store in original containers.</li> <li>Keep containers securely sealed.</li> <li>No smoking, naked lights or ignition sources.</li> <li>Store in a cool, dry, well-ventilated area.</li> </ul>				

### Conditions for safe storage, including any incompatibilities

<ul> <li>Metal can or drum</li> <li>Packaging as recommended by manufacturer.</li> <li>Check all containers are clearly labelled and free from leaks.</li> </ul>	
Storage incompatibility   Avoid reaction with oxidising agents	

#### **SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION**

### **Control parameters**

### OCCUPATIONAL EXPOSURE LIMITS (OEL)

#### INGREDIENT DATA

Source	Ingredient	Material name	TWA	STEL	Peak	Notes
US NIOSH Recommended Exposure Limits (RELs)	1-decene dimer, hydrogenated	Heavy mineral oil mist, Paraffin oil mist, White mineral oil mist	5 mg/m3	10 mg/m3	Not Available	Not Available
US ACGIH Threshold Limit Values (TLV)	1-decene dimer, hydrogenated	Mineral oil, excluding metal working fluids - Poorly and mildly refined	Not Available	Not Available	Not Available	TLV® Basis: URT irr

Chemwatch: 12-05093 Page 4 of 10 Issue Date: 09/07/2018
Version No: 2.1.1.1 Print Date: 11/07/2018

#### 20038 CENTRAL HYDRAULIC SYSTEM OIL 1L

US ACGIH Threshold Limit Values (TLV)	1-decene dimer, hydrogenated	Mineral oil, excluding metal working fluids - Pure, highly and severely refined	5 mg/m3	Not Available	Not Available	TLV® Basis: URT irr
US OSHA Permissible Exposure Levels (PELs) - Table Z1	1-decene dimer, hydrogenated	Oil mist, mineral	5 mg/m3	Not Available	Not Available	Not Available
US NIOSH Recommended Exposure Limits (RELs)	2,6-di-tert-butyl- 4-methylphenol	BHT; Butylated hydroxytoluene; Dibutylated hydroxytoluene; 4-Methyl-2,6-di-tert-butyl phenol	10 mg/m3	Not Available	Not Available	Not Available
US ACGIH Threshold Limit Values (TLV)	2,6-di-tert-butyl- 4-methylphenol	Butylated hydroxytoluene	2 mg/m3	Not Available	Not Available	TLV® Basis: URT irr

#### EMERGENCY LIMITS

Ingredient	Material name	TEEL-1	TEEL-2	TEEL-3
2,6-di-tert-butyl-4-methylphenol	Bis(1,1-dimethylethyl)-4-methylphenol, 2,6-; (BHT (food grade); 2,6-Di-tert-butyl-p-cresol)	6 mg/m3	29 mg/m3	180 mg/m3

Ingredient	Original IDLH	Revised IDLH
1-decene dimer, hydrogenated	2500 mg/m3	Not Available
bis(2-methylpentan- 2-yl)dithiophosphoric acid/ amines	Not Available	Not Available
diisooctyl aminomethyl tolyltriazole	Not Available	Not Available
2,6-di-tert-butyl-4-methylphenol	Not Available	Not Available
2-(8-heptadecenyl)-4,5-dihydro- 1H-imidazole-1-ethanol	Not Available	Not Available

#### **Exposure controls**

## Appropriate engineering controls

Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.

The basic types of engineering controls are:

Process controls which involve changing the way a job activity or process is done to reduce the risk.

Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.

### Personal protection

## Eye and face protection

- ► Safety glasses with side shields
- Chemical goggles
- Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lenses or restrictions on use, should be created for each workplace or task.

#### Skin protection

#### See Hand protection below

- ▶ Wear chemical protective gloves, e.g. PVC.
- ▶ Wear safety footwear or safety gumboots, e.g. Rubber

### Hands/feet protection

The selection of suitable gloves does not only depend on the material, but also on further marks of quality which vary from manufacturer to manufacturer. Where the chemical is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

The exact break through time for substances has to be obtained from the manufacturer of the protective gloves and has to be observed when making a final choice.

Personal hygiene is a key element of effective hand care.

### Body protection

See Other protection below

Other protection

- Overalls.
- ► P.V.C. apron.

#### Cino protocion

### ► Barrier cream.

### Respiratory protection

Type AK-P Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 & 149:2001, ANSI Z88 or national equivalent)

Where the concentration of gas/particulates in the breathing zone, approaches or exceeds the "Exposure Standard" (or ES), respiratory protection is required. Degree of protection varies with both face-piece and Class of filter; the nature of protection varies with Type of filter.

Required Minimum Protection Factor	Half-Face Respirator	Full-Face Respirator	Powered Air Respirator
up to 10 x ES	AK-AUS P2	-	AK-PAPR-AUS / Class 1 P2
up to 50 x ES	-	AK-AUS / Class 1 P2	-
up to 100 x ES	-	AK-2 P2	AK-PAPR-2 P2 ^

#### ^ - Full-face

A(All classes) = Organic vapours, B AUS or B1 = Acid gasses, B2 = Acid gas or hydrogen cyanide(HCN), B3 = Acid gas or hydrogen cyanide(HCN), E = Sulfur dioxide(SO2), G = Agricultural chemicals, K = Ammonia(NH3), Hg = Mercury, NO = Oxides of nitrogen, MB = Methyl bromide, AX = Low boiling point organic compounds(below 65 degC)

Cartridge respirators should never be used for emergency ingress or in areas of unknown vapour concentrations or oxygen content. The wearer must be warned to leave the contaminated area immediately on detecting any odours through the respirator. The odour may indicate that the mask is not functioning properly, that the vapour concentration is too high, or that the mask is not properly fitted. Because of these limitations, only restricted use of cartridge respirators is considered appropriate.

### **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

Chemwatch: **12-05093** Page **5** of **10** 

Version No: **2.1.1.1**

### **SECTION 10 STABILITY AND REACTIVITY**

Reactivity	See section 7
Chemical stability	<ul> <li>Unstable in the presence of incompatible materials.</li> <li>Product is considered stable.</li> <li>Hazardous polymerisation will not occur.</li> </ul>
Possibility of hazardous reactions	See section 7
Conditions to avoid	See section 7
Incompatible materials	See section 7
Hazardous decomposition products	See section 5

### **SECTION 11 TOXICOLOGICAL INFORMATION**

#### Information on toxicological effects

Information on toxicological	errects			
Inhaled	Inhalation hazard is increased at higher temperatures. 512r20ll			
Ingestion	Swallowing of the liquid may cause aspiration into the lungs with the	e risk of chemical pneumonitis; serious consequences may result. (ICSC13733)		
Skin Contact	There is some evidence to suggest that this material can cause inflammation of the skin on contact in some persons.  Open cuts, abraded or irritated skin should not be exposed to this material  Entry into the blood-stream, through, for example, cuts, abrasions or lesions, may produce systemic injury with harmful effects. Examine the skin prior to the use of the material and ensure that any external damage is suitably protected.			
Eye		Although the liquid is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).		
Chronic	Long-term exposure to the product is not thought to produce chroni nevertheless exposure by all routes should be minimised as a matte	c effects adverse to the health (as classified by EC Directives using animal models); or of course.

	substances is low. The testing for acute toxicity spans five of Repeat dose toxicity: Repeat dose studies on the memb target organ in rats for all of the substances tested. Data show that acute toxicity following oral and topical use of affect the liver, thyroid, kidney and lymph nodes. Liver tumou. The substance is classified by IARC as Group 3:  NOT classifiable as to its carcinogenicity to humans. Evidence of carcinogenicity may be inadequate or limited in NOTE: Substance has been shown to be mutagenic in at le DNA.  * Degussa SDS Effects such as behavioral changes, reducted administration of BHT to mice and rats. Toxic effects may be	pers of this category include both subchronic and chronic exposures. The liver is identified as the of hindered phenols is low. They are not proven to cause mutations. However, long term use mutations are proven to cause mutations.
2,6-DI-TERT-BUTYL- 4-METHYLPHENOL	1-one, CAS RN: 2607-52-5) is a very reactive compound w promotion in mice. In addition, it was reported that another 2,5-cyclohexadien-1-one, CAS RN: 124755-19-7), is chem responsible for lung tumor promotion activity of BHT in mic was added in excess to a wheat seedling medium in aerobi reactive particle that may damage cellular structures at hig in rats fed with diets containing 0.2% of BHT for 30 days. D induce experimental models of oxidative stress in several air reported that at high aeration rate, BHT can react with moles.	which is considered to play a significant role in hepatoxicity, pneumotoxicity, and skin tumor rquinone derivative, BHT-OH(t)QM (syn 2-tert-butyl-6-(2-hydroxy-tert-butyl-4-methylene- nically more reactive than BHT-QM, and it has been recognized as the principal metabolite  bee. BHT has been reported to exert prooxidant effects under certain conditions. Thus, when Bhic conditions, an enhancement of the generation rate of superoxide anion was observed. This is  sigh concentrations in addition, an increase in hepatic microsomal lipid peroxidation was observed. Due to this ability of BHT to exert prooxidant effects at high concentrations, it has been used  nimals and fungi in order to study the protective effects of other compounds. Some authors have  ecular oxygen rather than with the reactive oxygen species present, yielding BHT-phenoxyl  ical itself may undergo redox recycling which can be a critical factor depending on the reductal

focused on their carcinogenicity and toxicity, and not only on that of BHT. The metabolite BHT-QM (syn: 2,6-di-tert-butyl-1,4-methylene-2,5-cyclohexadien-1-one, CAS RN: 2607-52-5) is a very reactive compound which is considered to play a significant role in hepatoxicity, pneumotoxicity, and skin tumor promotion in mice. In addition, it was reported that another quinone derivative, BHT-OH(t)QM (syn 2-tert-butyl-6-(2-hydroxy-tert-butyl-4-methylene-2,5-cyclohexadien-1-one, CAS RN: 124755-19-7), is chemically more reactive than BHT-QM, and it has been recognized as the principal metabolite responsible for lung tumor promotion activity of BHT in mice. BHT has been reported to exert prooxidant effects under certain conditions. Thus, when BHT was added in excess to a wheat seedling medium in aerobic conditions, an enhancement of the generation rate of superoxide anion was observed. This is a reactive particle that may damage cellular structures at high concentrations in addition, an increase in hepatic microsomal lipid peroxidation was observed in rats fed with diets containing 0.2% of BHT for 30 days. Due to this ability of BHT to exert prooxidant effects at high concentrations, it has been used to induce experimental models of oxidative stress in several animals and fungi in order to study the protective effects of other compounds. Some authors have reported that at high aeration rate, BHT can react with molecular oxygen rather than with the reactive oxygen species present, yielding BHT-phenoxyl radical and superoxide anion. In addition, the phenolic radical itself may undergo redox recycling which can be a critical factor depending on the reductant involved However, it has to be noted that BHT-phenoxyl radical has been reported to be relatively stable. Furthermore, the potential reactivity of BHT-derived metabolites should be taken into account; some studies reported that not only BHT but also its metabolites, such as BHT-Q and BHT-QM, can act as prooxidant. As BHT undergoes several reactions during biotransformati

#### 2-(8-HEPTADECENYL)-4,5-DIHYDRO-1H-IMIDAZOLE-1-ETHANOL

1-DECENE DIMER,

Generally these amphoteric surfactants do not seem to irritate the skin, but they mildly irritate the eye. They also do not cause mutations. Information on effects on reproduction and ability to cause cancer is unavailable.

The material may produce moderate eye irritation leading to inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis. The material may produce respiratory tract irritation, and result in damage to the lung including reduced lung function.

HYDROGENATED & BIS(2-METHYLPENTAN-2-YL)DITHIOPHOSPHORIC ACID/ AMINES & DIISOOCTYL AMINOMETHYL TOLYLTRIAZOLE & 2-(8-HEPTADECENYL)-4,5-DIHYDRO-1H-IMIDAZOLE-1-ETHANOL

1-FTHANOL

The following information refers to contact allergens as a group and may not be specific to this product.

Contact allergies quickly manifest themselves as contact eczema, more rarely as urticaria or Quincke's oedema. The pathogenesis of contact eczema involves a cell-mediated (T lymphocytes) immune reaction of the delayed type. Other allergic skin reactions, e.g. contact urticaria, involve antibody-mediated immune reactions.

2,6-DI-TERT-BUTYL-4-METHYLPHENOL & 2-(8-HEPTADECENYL)-4,5-DIHYDRO-1H-IMIDAZOLE-1-ETHANOL Asthma-like symptoms may continue for months or even years after exposure to the material ends. This may be due to a non-allergic condition known as reactive airways dysfunction syndrome (RADS) which can occur after exposure to high levels of highly irritating compound. Main criteria for diagnosing RADS include the absence of previous airways disease in a non-atopic individual, with sudden onset of persistent asthma-like symptoms within minutes to hours of a documented exposure to the irritant. Other criteria for diagnosis of RADS include a reversible airflow pattern on lung function tests, moderate to severe bronchial hyperreactivity on methacholine challenge testing, and the lack of minimal lymphocytic inflammation, without eosinophilia. The material may cause skin irritation after prolonged or repeated exposure and may produce on contact skin redness, swelling, the production of vesicles, scaling and thickening of the skin.

Issue Date: **09/07/2018**Print Date: **11/07/2018** 

Ingredient	Mobility
2,6-di-tert-butyl-4-methylphenol	LOW (KOC = 23030)
2-(8-heptadecenyl)-4,5-dihydro- 1H-imidazole-1-ethanol	LOW (KOC = 206300)

#### **SECTION 13 DISPOSAL CONSIDERATIONS**

#### Waste treatment methods

Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

A Hierarchy of Controls seems to be common - the user should investigate:

- ▶ Reduction
- ► Reuse
- Recycling
- Disposal (if all else fails)

#### Product / Packaging disposal

This material may be recycled if unused, or if it has not been contaminated so as to make it unsuitable for its intended use.

- ▶ DO NOT allow wash water from cleaning or process equipment to enter drains.
- ▶ It may be necessary to collect all wash water for treatment before disposal.
- In all cases disposal to sewer may be subject to local laws and regulations and these should be considered first.
- ▶ Where in doubt contact the responsible authority.
- ▶ Recycle wherever possible or consult manufacturer for recycling options.
- ▶ Consult State Land Waste Authority for disposal.
- ▶ Bury or incinerate residue at an approved site.
- ▶ Recycle containers if possible, or dispose of in an authorised landfill.

#### **SECTION 14 TRANSPORT INFORMATION**

#### Labels Required

Marine Pollutant

NO

Land transport (DOT): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Air transport (ICAO-IATA / DGR): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Sea transport (IMDG-Code / GGVSee): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Transport in bulk according to Annex II of MARPOL and the IBC code

Not Applicable

### **SECTION 15 REGULATORY INFORMATION**

#### Safety, health and environmental regulations / legislation specific for the substance or mixture

# 1-DECENE DIMER, HYDROGENATED(68649-11-6) IS FOUND ON THE FOLLOWING REGULATORY LISTS International Agency for Research on Cancer (IARC) - Agents Classified by the IARC US - Vermont F

International Agency for Research on Cancer (IARC) - Agents Classified by the IARC	US - Vermont Permissible Exposure Limits Table Z-1-A Final Rule Limits for Air Contaminants
Monographs	US - Vermont Permissible Exposure Limits Table Z-1-A Transitional Limits for Air

### 20038 CENTRAL HYDRAULIC SYSTEM OIL 1L

Issue Date: **09/07/2018**Print Date: **11/07/2018** 

US Toxic Substances Control Act (TSCA) - Chemical Substance Inventory

US TSCA Chemical Substance Inventory - Interim List of Active Substances

#### **Federal Regulations**

### Superfund Amendments and Reauthorization Act of 1986 (SARA)

### SECTION 311/312 HAZARD CATEGORIES

Flammable (Gases, Aerosols, Liquids, or Solids)	No
Gas under pressure	No
Explosive	No
Self-heating	No
Pyrophoric (Liquid or Solid)	No
Pyrophoric Gas	No
Corrosive to metal	No
Oxidizer (Liquid, Solid or Gas)	No
Organic Peroxide	No
Self-reactive	No
In contact with water emits flammable gas	No
Combustible Dust	No
Carcinogenicity	No
Acute toxicity (any route of exposure)	Yes
Reproductive toxicity	No
Skin Corrosion or Irritation	No
Respiratory or Skin Sensitization	No
Serious eye damage or eye irritation	No
Specific target organ toxicity (single or repeated exposure)	No
Aspiration Hazard	Yes
Germ cell mutagenicity	No
Simple Asphyxiant	No

### US. EPA CERCLA HAZARDOUS SUBSTANCES AND REPORTABLE QUANTITIES (40 CFR 302.4)

None Reported

### **State Regulations**

### US. CALIFORNIA PROPOSITION 65

WARNING: This product contains a chemical known to the State of California to cause cancer and birth defects or other reproductive harm

### US - CALIFORNIA PROPOSITION 65 - CARCINOGENS & REPRODUCTIVE TOXICITY (CRT): LISTED SUBSTANCE

Soots, tars, and mineral oils (untreated and mildly treated oils and used engine oils) Listed

### **National Inventory Status**

National Inventory	Status
Australia - AICS	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
Canada - DSL	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
Canada - NDSL	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines; 1-decene dimer, hydrogenated; 2-(8-heptadecenyl)-4,5-dihydro-1H-imidazole-1-ethanol; diisooctyl aminomethyl tolyltriazole)
China - IECSC	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
Europe - EINEC / ELINCS / NLP	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
Japan - ENCS	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines; 1-decene dimer, hydrogenated)
Korea - KECI	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
New Zealand - NZIoC	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
Philippines - PICCS	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines)
USA - TSCA	N (bis(2-methylpentan-2-yl)dithiophosphoric acid/ amines; diisooctyl aminomethyl tolyltriazole)
Legend:	Y = All ingredients are on the inventory N = Not determined or one or more ingredients are not on the inventory and are not exempt from listing(see specific ingredients in brackets)

### **SECTION 16 OTHER INFORMATION**

Revision Date	09/07/2018
Initial Date	09/07/2018

#### Other information

### Ingredients with multiple cas numbers

Name	CAS No

Chemwatch: 12-05093 Page 10 of 10 Issue Date: 09/07/2018 Version No: 2.1.1.1 Print Date: 11/07/2018

### 20038 CENTRAL HYDRAULIC SYSTEM OIL 1L

diisooctyl aminomethyl tolyltriazole	80584-90-3, 80595-74-0
2,6-di-tert-butyl-4-methylphenol	128-37-0, 31194-40-8, 97123-41-6, 25377-21-3, 102962-45-8, 259752-53-9, 290348-23-1, 36631-28-4, 42615-30-5, 50356-19-9, 50641-99-1, 52683-46-2, 53571-70-3, 58500-82-6, 83047-16-9

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.

#### **Definitions and abbreviations**

PC-TWA: Permissible Concentration-Time Weighted Average

 ${\sf PC-STEL} : {\sf Permissible Concentration-Short Term Exposure Limit}$ 

IARC: International Agency for Research on Cancer

ACGIH: American Conference of Governmental Industrial Hygienists

STEL: Short Term Exposure Limit

TEEL: Temporary Emergency Exposure Limit。

IDLH: Immediately Dangerous to Life or Health Concentrations

OSF: Odour Safety Factor

NOAEL :No Observed Adverse Effect Level LOAEL: Lowest Observed Adverse Effect Level

TLV: Threshold Limit Value LOD: Limit Of Detection OTV: Odour Threshold Value BCF: BioConcentration Factors BEI: Biological Exposure Index
