

Mach One

Part No. MM12K & MM12KC

Wiring Instructions: Black (+) Blue (-)

This fan must be wired as a "pusher" fan. (Check to see that the word "pusher" is showing on the fan hub as pictured above) If you are using with an MFA100 or other wire harness, you must connect the (+)12V wire to the black lead on the fan motor and the (-)12V lead to the blue wire on the motor for proper functioning.

MOUNTING DIRECTIONS:

The Mach One fan is a universal fan designed to be installed either horizontally or vertically depending on the position of the water tanks.

Caution: Always use star nuts to stabilize the All-thread rods. Be sure not to over tighten the Mach One to the heat exchanger as it may cause damage.

Using hardware provided in universal bracket kit, install using one of the methods below.
