

EXPERTS IN AUTOMOTIVE ACOUSTICS & THERMAL MANAGEMENT

Reduce Noise in your kitchen, laundry room and throughout your home!

HushMat provides an easy step by step process for you to properly insulate your washing machine. Are you tired of having to raise the volume on your TV or have to close the door of your laundry room to reduce the noise? HushMat is the solution for you. HushMat is designed to reduce noise and vibration in your home to keep it quiet. HushMat is perfect for dishwashers, washing machines and heat, air conditioning and ventilation equipment. HushMat is focused on you, and maintaining a calm and quiet environment in your home. Click on the following links or type it into your browser for additional Home “HushMat Quiet” applications. HushMat Application “Quiet” Stainless Steel Sinks:

Dishwasher (Part #'s: 71200, 712001, 712002):

Use a HushMat Pro – Roller (#90100), screw driver and sharp box knife or pair of scissors is all that is required.

Prior to removing the release paper from the product – remove the screws or fasteners from underneath the edge of the counter top.

Remove the blanket or wrap from around the dishwasher tub and set it carefully aside as you will re-install it.

Layout the pieces of HushMat on the all five sides of the dishwasher tub to determine if there is any wiring or hoses that must pass through the HushMat. If so – mark those areas with a sharpie and cut them out prior to removing the release paper. Peel back the release paper on one HushMat piece at a time and press onto each of the five exposed sides of the tub. It may be easier on some dishwasher models to cut the sheets in half in the long direction for easier fit. Cover majority of all five sides and re-install the blanket. Slide the unit back under the counter – reinstall the screws and enjoy the Quiet!

Reduce Noise in your kitchen, laundry room and throughout your home (Continued)!

Heating, Ventilation (Ducts) and Air Conditioning (Part #'s 721212, 722424, 723030, 724848):

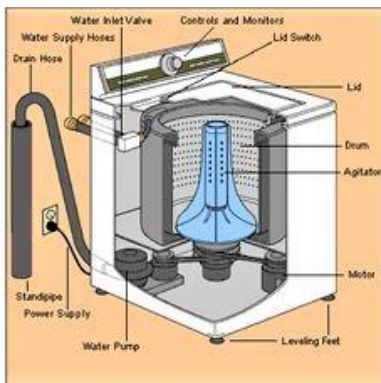

When your A/C comes on in the summer or Heat in the winter do you hear the rattles and vibration of the system? When that cold air hits a warm metal duct, do you hear the “boom”? HushMat is the simple solution for blocking that noise. Are there gaps in your HVAC ducts that allow your heating and a/c bills to soar? Save the lost dollars by sealing the joints with HushMat.

Peel and stick the sheets of HushMat directly onto the sheet metal ducts and enjoy a peaceful and quiet nights sleep.

Place on ducts to eliminate the hot/cold/hot boom, on all seams to seal up your HVAC and stop wasting dollars in lost a/c and heat.

Washing Machine Quiet Kit (Part #'s 73200, 732001, 732002):

You can gain access to the front, sides and floor pan of the washing machine by removing the back panel. Follow the manufacturers instruction for disassembly and re-assembly of your washing machine. Take care not to disconnect and wiring, fill or drain tubes during the installation process. Please a sheet of HushMat on each of the four side panels – anywhere near the center of each panel. Please a single sheet on the floor sheet metal. Re-install the back panel and enjoy the Quiet!
