## Suggested sales script/talking points.

YOU: How much music do you want to hear from your speakers?

CUSTOMER: "All of it!"

YOU: YOU NEED THIS!

YOU: HushMat Speaker Kit is a gasket between the metal speaker and the metal door. When the cone moves it creates vibration that turns into noise from the door. HushMat eliminates vibration so you hear the music and not the noise.

All speakers transmit sound waves in two directions—out the front of the speaker is music—out the back is called back wave. When this back hits the solid surface of the door it bounces back and takes the speaker out of phase. HushMat Wave Breaker absorbs these back waves so pure sound is all you hear.

**The product eliminates distortion of your music. It complements every speaker and subwoofer install.**

You get Better Sound....GUARANTEED!

CUSTOMER: How hard is it to install?

YOU: *(Hand to customer a Speaker Kit and Wave Breaker box from the display.)*

**HushMat is the #1 Rated Automotive Sound Deadening and Thermal Insulation Material on the market! AND all HushMat products are made in the USA.**

Install is very SIMPLE and the best part—we already have the car apart to install the speakers.

If you are going to install it yourself, there is an installation guide in the box and also at [www.hushmat.com](http://www.hushmat.com)

Hushmat has been manufactured for the automotive industry for 26 years. This stuff works! It makes an incredible difference in the sound quality of your vehicle.
