

Side Bracket Kit (Linear)

Product Description

Pre-treated with an e-coating for maximum corrosion resistance, then powder coated black for a sleek finish, the side bracket kit from Lazer offers versatility and sleek styling, when combined with the Linear high performance LED spotlights. Made from stainless steel and with A2 stainless steel hardware included, the bracket orientation can be altered in order to raise/lower the light <13mm relative to the vehicle mounting point.

For use with Linear products only.
