Bolt Kit

PARTS LIST:

Qty	Part Description	Qty	Part Description
12	8mm x 25mm Hex Bolts	12	Lock Washers
12	5/16 Flat Washers		

NOTE: Some models only require 12 each

Tools Needed

13mm wrench or socket	12mm wrench or socket (used to remove factory bolts)
-----------------------	--

INSTALLATION PROCEDURE:

Step 1. Remove any factory hardware and discard. Position the Nerf Step on the side of the vehicle (figure 1). NOTE: The short end of the Nerf Step goes to the front of the vehicle. Test fit the Nerf Step to the factory bolt hole locations. NOTE: The step should line up with the existing factory bolt locations.

Step 2. Starting with one of the center brackets, start the 8mm hex bolt, 8mm lock washer and 8mm flat washer into the factory bolt locations and hand tighten (figure 2). Start all of the remaining 8mm hex bolts, 8mm lock washers and 8mm flat washers. Torque each bolt location to 15ft/lbs.

Step 3. Repeat installation procedures on the passenger side.

This concludes the installation

PRODUCT CARE

- Periodically check the product to ensure all fasteners are tight and components are intact.
- Regular waxing is recommended to protect the finish of the product.
- **Use ONLY Non-Abrasive automotive wax.** Use of any soap, polish or wax that contains an abrasive is detrimental and can scratch the finish leading to corrosion.
- Aluminum polish may be used to polish small scratches and scuffs for **Stainless Steel finish.**
- Mild soap may be used to clean the product for both **Stainless Steel and Black finish.**

FAQ's**1. Hardware's are not of correct size.**

In GMC / Chevrolet truck model 2006 & up, customer needs to reuse the factory body bolts to install the bracket. If your vehicle is not GMC / Chevrolet 2006 & up, ensure that holes are not partially covered with any plastic grommet or rust? If it is, remove the plastic grommet & rust from the thread holes & re-try the installation.

2. Mounting Bracket are not getting Installed properly.

In some cases Illustration images shown in Installation manual may not be the exactly same as per actual vehicle images ,also if Driver / Passenger side mounting brackets are very identical in the design, suggest referring Parts Identification guide to avoid fitment issue.

3. Products are thumping / rattling after installation.

Ensure that all required mounting brackets / hardware's are installed & tighten correctly. Suggest using white lithium / regular grease between the metal to metal contact surfaces.

4. Side Bar is not aligning with vehicle / Step Pads are not aligning with vehicle doors.

Side bar may be interchanged or mounting brackets are not installed at the correct position in the vehicle. Refer Parts identification guide.

5. Missing / Excess Hardware.

Recheck hardware count as per the part list.

6. Product not installing properly.

Ensure make model year, cab length and bed size of your vehicle is listed in the application. All installation steps are followed correctly.
