## ⚠ Important Safety Information ⚠

- CAUTION - Before driving, ensure that the vent visors are properly secured to vehicle.
  - Do not use automatic "brush-style" car washes.
  - Do not use cleaning solvents of any kind.
  - Periodically check all components for tightness.
  - When using Surface Prep, avoid contact with skin. Use in well-ventilated area. If contact is made with material, flush area with large amounts of water. If irritation persists, get immediate medical attention.
- USE PREP ON RUBBER ONLY

### Tools Required

Car Wash Supplies

Clean Towel

## Preparation before Painting / Installation

- A trial fit is recommended to ensure proper positioning and fit.
- Check fit of parts before painting as we will not accept the return of modified or painted parts.
- Wash your vehicle to remove any debris and/or dirt.
- Dry with a clean towel.

### INSTALLATION STEPS

**NOTE:** Actual application may vary slightly from illustrations.

Roll down window. Buff the inside felt surface with scotch brite pad. Then clean with alcohol pad.

Remove the tape from the rear flanges. Peel back 2" (5cm) of tape liner from each end of top flange.

Apply one coat of surface prep to rubber trim. Prep rubber trim on both sides before installing visors.

**NOTE:** See warning on page 1 regarding surface prep

Insert visor into window channel, front flange first, then seat rear flange.

Press the exposed area of tape against the surface and verify position.

With the visor in its final position, remove the remainder of the tape liner by pulling on free ends.

7

Apply pressure along the inside of window channel and flange edges to secure in place.

8

Roll up window and leave window up for 24 hours to ensure proper adhesion.

9

4 Piece Set

rear visor in final position

Repeat **Steps 1-9** for passenger side.

Install the rear visors using the same preparation and installation methods as the front visor.

### Information's importantes concernant la sécurité

- ATTENTION – Avant de conduire, s'assurer que la visière est solidement assujettie sur le véhicule.
- Ne pas utiliser les stations de lavage de voitures à brosses.
- Ne pas utiliser de solvants.
- Vérifier régulièrement le serrage des composants.
- En utilisant la préparation extérieure, évitez le contact avec la peau. Employez dans le secteur bien aéré. Si le contact est fait avec le matériel, secteur affleurant avec de grandes quantités de l'eau. Si l'irritation persiste, obtenez une attention médicale immédiate. EMPLOYEZ LA PRÉPARATION SUR LE CAOUTCHOUC SEULEMENT.

### Préparation pour la peinture/l'installation

- Il est recommandé de procéder à un essai pour s'assurer que le positionnement et l'ajustement sont corrects.
- Vérifier l'ajustement des pièces avant peinture, car nous n'acceptons pas le retour de pièces modifiées ou peintes.
- Lavez votre véhicule pour enlever n'importe quels débris et/ou saleté..
- Séchez avec une serviette propre.

### Étapes d'installation

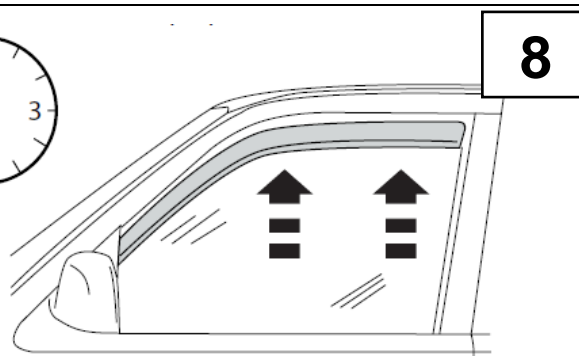

**REMARQUE :** La méthode d'application peut être légèrement différente de celle représentée par les illustrations.

 <p><b>1</b></p> <p>Abaissez la glace. Polissez la surface de feutre intérieure avec un tampon Scotch Brite. Nettoyez-a ensuite avec un tampon à l'alcool.</p>	 <p><b>2</b></p> <p>Retirez l'adhésif des rebords avant et arrière. Décollez 5 cm (2 po) de protection d'adhésif à chaque extrémité du rebord supérieur.</p>
 <p><b>3</b></p> <p>Appliquez un manteau de préparation extérieure à l'équilibre en caoutchouc. Préparez l'équilibre en caoutchouc des deux côtés avant d'installer des pare-soleil.</p> <p><b>NOTE:</b> Voir l'avertissement à la page 1 concernant la 4 préparation extérieure</p>	 <p><b>4</b></p> <p>Insérez le pare-soleil dans le canal de fenêtre, bride avant d'abord, posez ensuite la bride arrière.</p>
 <p><b>5</b></p> <p>Poussez la région exposée de l'adhésif contre la surface et vérifiez-en la position.</p>	 <p><b>6</b></p> <p>La visière se trouvant en position finale, retirez le reste de la protection d'adhésif en tirant sur les extrémités libres.</p>

7

Exercez une pression le long de l'intérieur de la glissière de la glace et du rebord pour fixer le tout en place.

8

Relevez la glace et laissez-la remontée pendant 24 heures pour produire une bonne adhésion.

9

visière arrière en position finale

Répétez **les étapes 1 à 9** du côté du passager.

Installez visière arrière en utilisant les mêmes méthodes de préparation et d'installation que le pare-soleil avant.

## Información importante de seguridad

- PRECAUCIÓN - Antes de conducir, asegúrese de que la visera deflectora esté correctamente anclada al vehículo.
  - No utilice servicios automáticos de limpieza de vehículos que utilizan cepillos.
  - No utilice limpiadores al solvente de ningún tipo.
  - Compruebe periódicamente que todos los componentes estén ajustados.
  - Al usar la preparación superficial, evite el contacto con la piel. Utilice en área bien ventilada. Si el contacto se hace con el material, área rasante con cantidades grandes de agua. Si persiste la irritación, consiga la atención médica inmediata.
- UTILICE LA PREPARACIÓN EN EL CAUCHO SOLAMENTE

### Preparación antes de pintar o instalar

- Se recomienda realizar un ajuste de prueba para asegurar el posicionamiento y ajuste correctos.
- Compruebe que las piezas se ajusten correctamente antes de pintarlas, ya que no aceptaremos la devolución de piezas modificadas o pintadas.
- Lave su vehículo para quitar cualquier ruina y/o suciedad.
- Séchez avec une serviette propre.

### Pasos de instalación

**AVISO:** La colocación real puede variar con respecto a las ilustraciones.

Baje la ventanilla. Pule la superficie de fieltro con un paño para restregar Scotch Brite. Luego limpie con un paño esterilizado.

Quite la cinta del reborde frontal y trasero. Retire 2 pulgs. (5 cm) de cinta protectora de cada uno de los extremos del reborde superior.

Aplique una capa de preparación superficial al ajuste de goma. Prepare el ajuste de goma en ambos lados antes de instalar los viseras.

**NOTA:** Vea la advertencia en la página 1 con respecto a la preparación superficial

Inserte el visera en el canal de la ventana, reborde delantero primero, en seguida asiente el reborde posterior.

Presione la cinta expuesta sobre la superficie y verifique la posición.

Con la visera en su posición definitiva, quite la cinta protectora restante tirando de los extremos que quedaron libres.

7

Presione el interior del canal de la ventanilla y los bordes del reborde para asegurarlo en su lugar.

8

Cierre la ventanilla por 24 horas para asegurarse de que se adhiera correctamente.

9

visera trasera  
en posición  
definitiva

Repita **los pasos 1 a 9** para el lado del acompañante.

La visera trasera del conductor se fija a la superficie de fieltro siguiendo el mismo procedimiento.

**PRODUCT CARE**

- Periodically check the product to ensure all fasteners are tight and components are intact.
- Regular waxing is recommended to protect the finish of the product.
- **Use ONLY Non-Abrasive automotive wax.** Use of any soap, polish or wax that contains an abrasive is detrimental and can scratch the finish leading to corrosion.
- Aluminum polish may be used to polish small scratches and scuffs for **Stainless Steel finish.**
- Mild soap may be used to clean the product for both **Stainless Steel and Black finish.**

**FAQ's****1. Hardware's are not of correct size.**

*In GMC / Chevrolet truck model 2006 & up, customer needs to reuse the factory body bolts to install the bracket. If your vehicle is not GMC / Chevrolet 2006 & up, please ensure that holes are not partially covered with any plastic grommet or rust? If it is, please remove the plastic grommet & rust from the thread holes & re-try the installation.*

**2. Mounting Bracket are not getting Installed properly.**

*In some cases Illustration images shown in Installation manual may not be the exactly same as per actual vehicle images ,also if Driver / Passenger side mounting brackets are very identical in the design, suggest referring Parts Identification guide to avoid fitment issue.*

**3. Products are thumping / rattling after installation.**

*Please ensure that all required mounting brackets / hardware's are installed & tighten correctly. Suggest using white lithium / regular grease between the metal to metal contact surfaces.*

**4. Side Bar is not aligning with vehicle / Step Pads are not aligning with vehicle doors.**

*Side bar may be interchanged or mounting brackets are not installed at the correct position in the vehicle. Please refer Parts identification guide.*

**5. Missing / Excess Hardware.**

*Recheck hardware count as per the part list.*

**6. Product not installing properly.**

*Ensure make model year, cab length and bed size of your vehicle is listed in the application. All installation steps are followed correctly.*
