Fluid Delivery

Vibrant Performance has developed one of the most comprehensive and diverse offerings of high performance Fluid Delivery Components and we are excited to continue growing this program.

As you browse the pages of our new catalog, you will find hundreds of new parts that have been developed to better serve our customers.

Our ever-expanding program, consists of flexible race hoses, hose end fittings, a huge selection of adapter fittings, weld bungs, valves, fluid filters, catch cans, a variety of tools & accessories and so much more. These race proven products continue to deliver outstanding quality and reliability at a fantastic value.

Vibrant Performance has emerged as the source for top quality, and readily accessible professional plumbing solutions, all delivered at a great value.

Stainless Steel Braided Flex Hose

- Stainless Steel braided cover (to resist against abrasion and corrosion) surrounds a reinforced synthetic rubber inner liner.
- Suitable for oil, water, fuel, methanol, coolant and vacuum service. Suitable for E85.
- **NOT suitable for use as brake lines or other hydraulic pressure lines, nor are they suited for extended submersion in fuel or oil (not recommended for in-tank applications).**
- Operating temperature range: -40°F to 300°F (-40°C to 150°C).
- Vibrant Performance Stainless Steel Braided Flex Hoses listed on this page are to be paired exclusively with Vibrant Hose End Fittings on pages 12-13 of this catalog.

Note: Please refer to vibrantperformance.com for minimum bend radius data for each of the hoses listed above.

Hose Cutting Shears

- These heavy duty hose shears feature curved jaws that are ideal for achieving easy, clean cuts to Braided and Non-Braided Flex Hoses.
- For use ONLY with -3 AN to -20 AN flex hoses.
- DO NOT use for cutting Aluminum Hardline.

Part No. 2989

Note: Please refer to vibrantperformance.com for best practices to keep the blades on your Hose Cutting Shears sharp.

Clean Cut Self Adhesive Tape

Vibrant Performance Clean Cut Self Adhesive film and tape allows you to make clean and professional cuts of Braided Flex Hoses with no fraying, making installation of socket nuts easy.

Use our White PE Adhesive Tape (#2970) for cutting Stainless Steel Braided Hose.

When cutting Nylon Braided Hose, first wrap a layer of our Clear Film (#2971) where you plan to make your cut, followed by a layer of the White Adhesive Tape (#2970).

Note: Please refer to Appendix Section of this catalog (page 127) for best practices for using Clean Cut Self Adhesive Tape.

Description	Part No.
White PE Self Adhesive Tape - 2 meter roll	2970
Clear Self Adhesive Film - 5 meter roll	2971

TECH TIP - PROTECTIVE SLEEVING FOR RACE HOSES

Vibrant Performance offers a wide assortment of Flexible Sleeving options designed to offer outstanding protection for your Braided Flexible Race Hoses from ambient temperatures ranging from 500°F (260°C) all the way up to 1400°F (760°C).

Vibrant's range of Hose Protection sleeves are easy to install, will not melt, delaminate or become brittle under normal operating conditions and provides a professional solution to your thermal protection needs.

See Page 121 to view our complete assortment of Wire and Hose Protection Products.

Nylon Braided Lightweight Flex Hose

All Black

Black/Blue

Black/Red

- The nylon braided cover provides excellent abrasion resistance. A flexible stainless steel inner core reinforces the synthetic rubber inner liner for improved strength.
- Up to 40% lighter than Stainless Steel Braided Flex Hoses.
- Suitable for oil, water, fuel, methanol, coolant and vacuum service. Suitable for E85.
- **NOT suitable for use as brake lines or other hydraulic pressure lines, nor are they suitable for extended submersion in fuel or oil (not for in-tank applications).**
- Operating temperature range: -40°F to 300°F (-40°C to 150°C).
- Vibrant Performance Nylon Braided Flex Hoses listed on this page are to be paired exclusively with Vibrant Hose End Fittings on pages 12-13 of this catalog.

Note: Please refer to vibrantperformance.com for minimum bend radius data for each of the hoses listed above.

Flex Hose Inner Support Springs

A support spring provides your braided flex hoses with critical support to avoid collapse under extreme vacuum or if attempting very tight bends.

Not intended for use with PTFE lined flex hose.

To Fit AN Hose Size	Spring Length	Part No.
-6	47-1/4" (1.2 meters)	17306
-8	47-1/4" (1.2 meters)	17308
-10	47-1/4" (1.2 meters)	17310
-12	47-1/4" (1.2 meters)	17312
-16	47-1/4" (1.2 meters)	17316
-20	47-1/4" (1.2 meters)	17320

Aluminum Swivel Hose End Fittings, Female AN

Vibrant swivel-style Hose End Fittings deliver the type of quality, reliability, smooth flow and ease of assembly that industry professionals demand. Made from 6061 Aluminum Alloy, these lightweight fittings are suitable for use in oil, fuel, coolant and vacuum applications and feature double PTFE O-Ring seals for leak-free service when installed properly. Best of all, they look great too. Our signature Double Anodized and Polished finish delivers remarkable color consistency from one batch to the next. **Available in Black Hard Anodized finish only.**

Stainless Steel Braided PTFE Flex Hose

- Features a highly durable and flexible PTFE inner liner that eliminates fuel vapor permeation.
- High Temperature resistant 300-series Stainless Steel braided cover offers superior protection against abrasion and corrosion.
- Suitable for all types of commonly used Race Fuels and Oils. Also suitable for Brake, Transmission, Clutch, Power Steering and Coolant fluids.
- Operating Temperature Range: -94°F to 480°F (-70°C to 250°C).

Stainless Steel Braided PTFE Flex Hose with Black Nylon Outer Braid

- Durable and lightweight PTFE lined flex hose that eliminates fumes.
- 300-series Stainless Steel braid layer protects the PTFE inner lined hose, which is then finished off by a black nylon braided cover that provides abrasion protection and looks great with Vibrant's line of Black Anodized Hoses.
- Suitable for all types of commonly used Race Fuels and Oils. Also suitable for Brake, Transmission, Clutch, Power Steering and Coolant fluids.
- Operating Temperature Range: -94°F to 480°F (-70°C to 250°C).

Aluminum High Flow Hose End Fittings (for use ONLY with PTFE lined flex hose)

Vibrant's offering of non-swivel High Flow Hose End Fittings, **designed exclusively for use with our offering of PTFE lined flex hose**, deliver the type of quality, leak-free reliability and incredible ease of assembly that industry professionals will appreciate. Now also available in -12 AN.

These CNC Machined 6061 Aluminum Alloy Hose Ends feature a full flow design and are optimal for use in race fuel systems as well as Nitrous, Cooling, Oil, Power Steering and Coolant (**not suited for brake and hydraulic line applications**). Each of these Hose Ends include an Aluminum olive that compresses to the PTFE liner for simple, leak free assembly. **Available in Black Hard Anodized finish only.**

Push-On Style Rubber Flex Hose

- Designed for use with Vibrant Push-On Style Hose Ends and Fittings.
- Suitable for oil, water, fuel, methanol, coolant and vacuum service. Suitable for use with E85 fuels but fumes will permeate through this type of hose.
- Operating temperature range: -40°F to 212°F (-40°C to 100°C).
- Recommended for light-duty applications only.
- **Available only in black.**

TECH TIP - PINCH CLAMPS

Vibrant Performance Stainless Steel Pinch Clamps are an ideal choice for securing Push-On style Flex Hose to fittings, especially if your application sees operating temperatures that exceed 150°F (66°C) or if used on oil and/or fuel systems. Refer to Page 39 for our complete offering of small diameter hose clamps.

Push-On Style Hose End Fittings, Female AN

- Vibrant Push-On Style Hose End Fittings are manufactured from 6061 Aluminum Alloy. **Available in Black Hard Anodized finish only.**
- These lightweight fittings allow for easy and secure hose assembly.
- Suitable for use with all Vibrant Push-On Style Flex Hose.

Aluminum Hardline Tubing

- Aluminum Hardline Tubing is very easy to cut, bend, flare and polish.
- Ideal for fuel, oil, coolant, water and even vacuum service. **Do not use for hydraulic pressurized lines (brake lines, power steering lines, etc.)**
- Available in Raw Alloy finish only. **Not suitable for E85 and alcohol service.**
- Vibrant Performance Aluminum Hardlines are to be paired exclusively with Vibrant Hardline Adapter Fittings on pages 18-19 of this catalog.

Thermostatic Oil Cooler Sandwich and Adapter Kit

Many stock engines do not come with an oil cooler. As a result, it doesn't take much to push engine oil to the brink of overheating when racing. Vibrant's new Oil Cooler Sandwich Adapters bypass hot oil through a cooling loop to help you keep your critical engine oil temperatures under control and allows you to retain your stock oil filter location.

Kit Part No. **17060**

Thermostatic Oil Sandwich Adapter
Part No. **17065**

Oil Filter Spacer Assembly
Part No. **17070**

Each Sandwich Adapter kit includes five (5) Oil Filter adapter bolts:

- M18 x 1.5 adapter
- M20 x 1.5 adapter
- M22 x 1.5 adapter
- 3/4" - 16 adapter
- 13/16" - 16 adapter

Part No.	Description
17060 *	Universal Thermostatic Oil Cooler Sandwich Adapter Kit with Spacer (includes Thermostat, 5 x Oil Filter adapter bolts, pair of -10 AN inlet/outlet Male Flare adapters and O-Ring seals)
17065 *	Universal Thermostatic Sandwich Adapter (without spacer) (includes Thermostat, 5 x Oil Filter adapter bolts, pair of -10 AN inlet/outlet Male Flare adapters and O-Ring seals)
17070 *	Oil Filter Spacer Assembly with 1/8" NPT sensor ports (also includes 5 x Oil Filter adapter bolts and O-Ring seals)

Note: Please refer to www.vibrantperformance.com to view all the Sandwich Adapter service parts (O-Rings, Adapter Bolts, etc...)

Billet Aluminum Dry Break Quick Release Adapters

Vibrant Performance Dry Break Quick Release Adapter Fittings are machined from 6061 Billet Aluminum, are very lightweight and allow for quick and easy disassembly by hand of any fluid related component, without mess or spills. Feature Fluorocarbon seals that make them suitable for use with oil, unleaded fuel and coolant applications.

AN Size	Max Operating Pressure	Part No.
-4	2400 psi	20804
-6	1200 psi	20806
-8	1200 psi	20808
-10	800 psi	20810
-12	800 psi	20812

Note: An asterisk () denotes a new part number.*

Universal Baffled Catch Can Assemblies

Vibrant Performance offers a pair of very unique Internally Baffled Catch Can Assemblies.

Our "OPEN LOOP" design features a recessed Stainless Steel Filter Element, and includes two (2) Male -10 AN Flare fittings (Part # 16836) integrated into the Catch Can's cap.

The "CLOSED LOOP" design is designed for MAF Sensor equipped vehicles and features four (4) Male -10 AN Flare fittings (Part # 16836) integrated into the cap.

All Vibrant Catch Can Assemblies share the following features:

- 6061 Aluminum construction.
- Tank Size: 4" (101.6mm) O.D. x 8" (203.2mm) tall.
Total Volume: 1.2 Litres (40.5 fluid oz).
- Internally baffled to improve oil vapor capture and collection while preventing contents from escaping.
- -8 ORB drain plug is integrated into bottom of can for easy draining (use with **Vibrant Drain Valve #12677**) or can be adapted as a return feed to the oil pan. 304
- Stainless Steel Mounting Bracket that can be clocked 360° to provide infinite mounting position options.
- Dipstick included to easily check fluid levels.
- Compatible with Vibrant Performance Fittings and Hoses.

Open Loop design

Replacement Dipstick	12693D *
Replacement Filter Element for 12695	12693F *
Replacement O-Ring Seals	12693R

TECH TIP

Recommended Setup for Open Loop Model

Vibrant's vented Catch Can is a perfect solution for cars with a MAP sensor based tuning system that need to expel crankcase pressure. The -10 AN fittings in the top cap will allow for ample flow out of the engine to the baffled catch can.

Recommended Setup for Closed Loop Model

Our Closed Loop Catch Can is a perfect solution for cars with a MAF sensor based tuning system that also need to remedy crankcase pressure. The closed loop catch cans keep the metered air that has passed through the MAF from escaping the tune. The included -10 AN fittings ensure ample flow in and out of the Vibrant Catch Can.

Universal Drain Valve, Male ORB

Suitable for use as a drain plug on any type of tank. Features a 1/8" NPT Female port for remote draining.

Note: Part 12677 (-8 ORB) is the Drain Valve for Vibrant Performance Catch Cans.

NEW

Vibrant HD PowerFilters

Vibrant's new HD PowerFilter series of high performance inline Fuel and Oil Filters provide outstanding filtration and offer you peace of mind for your fuel injected or carbureted engines, from 200HP all the way to 2500+ HP.

HD PowerFilters offer unparalleled fluid flow and are designed to allow for easy installation and removal for maintenance. Each HD PowerFilter includes a serviceable Stainless Steel filter element (your choice of 10, 40, 60 and 100 micron filters). An integrated magnet also allows for fine metallic particulate matter to be captured, keeping your investment safe.

These filters are machined from 6061 Aluminum and feature our signature Black Hard Anodized finish.

NEW

HD PowerFilter Mini

Turbo Oil Feed Inline Filters

These unique, flow directional Oil Filters can be configured with your choice of Male AN Flare inlet/outlet or with a Female AN inlet and Male AN Flare outlet.

Each Oil Filter kit also includes interchangeable 30, 80 and 150 micron filter elements, making them suitable for use with many different varieties of oil.

The contents of the kit:

AN Size	Part No.
-3	16733
-4	16734
-6	16736
-8	16738

Note:

- 30 micron element is recommended for lightweight engine oil.
- 80 micron element is recommended for heavyweight engine oil.
- 150 micron element is recommended for power steering and transmission oil.
- Regular maintenance of the filter screen is recommended for optimal performance.

Male/Male AN setup

Female/Male AN setup

Note: An asterisk (*) denotes a new part number.

Oil Restrictor Adapter Fitting Kits

Vibrant Performance Oil Restrictor adapter fittings allow you to limit oil flow to your turbo, minimizing the potential for oil seal damage.

Each restrictor fitting kit includes a pair of threaded jets (with openings measuring 0.030" and 0.045") that thread into the opening on the Male AN Flare end, allowing for customized oil flow control. Without restrictors installed, the fitting opening measures 0.060".

<i>Application</i>	<i>Part No.</i>
-4 AN x 7/16" - 24 Oil Restrictor Fitting for Garrett Ball Bearing Turbocharger (includes crush washer)	10287
-3 AN x 1/8" NPT Oil Restrictor Fitting Kit	10288
-4 AN x 1/8" NPT Oil Restrictor Fitting Kit	10289

Note: Refer to Turbo Manufacturer for Recommended Restrictor Size

Oil Feed Line Assemblies

All Vibrant Performance Oil Feed Line Assemblies include a PTFE lined Stainless Steel Flexible Hose and high quality AN Hose End Fittings.

<i>AN Size</i>	<i>Hose Length</i>	<i>Part No.</i>
-3	24" (610mm)	10270
-3	36" (915mm)	10271

Chevy LS Engine Oil Pressure Adapter

Part No. 16790

Allows you to retain the OEM oil pressure switch (with M16 x 1.5 thread) while running an oil reference port to your turbo or any related accessory (e.g. oil pressure gauge).

Includes three crush washers.

Features 1/8" NPT thread on Banjo.

Part No. 16791

Chevy LS Engine Fuel Pressure Adapter

Allows you to install an aftermarket fuel pressure gauge to your LS engine's factory fuel rail (must remove Schrader valve).

Features Female -4 AN thread on one end and Female 1/8" NPT thread on the other, making it useful for other applications as well.

Note: An asterisk (*) denotes a new part number.

Hose End Fitting Installation Toolkit

This handy toolkit simplifies the process of installing Flexible Braided Hoses to reusable Hose End fittings.

Includes Clamping Tool, Steel Jigs for AN sizes -4 through -12, a set of Aluminum Vise Jaws and comes complete with a convenient carry case.

Part No. 2992

Part No. 20990

Magnetic Billet Aluminum Vise Jaws

Vibrant Performance Billet Aluminum Vise Jaws securely hold your fittings without risk of damaging the high lustre anodized finish during assembly. The backside of these jaws have magnets built into them to hold them firmly in place in your vise.

Windshield Washer Bottle

The factory Windshield Washer Bottle on most vehicles tends to be very large, eating up valuable space in the engine bay. This problem is especially troublesome for anyone who tries to install an aftermarket Turbocharger or Supercharger kit.

Vibrant Performance offers a convenient solution to this common problem with our incredibly compact Universal Washer Bottle Kit, which includes everything you would need to replace the OEM washer fluid tank.

Each kit includes:

- A rugged plastic Washer Bottle,
- Electric Pump,
- Electric Plug with wire,
- Mounting Bracket,
- A Length of Hose to adapt to the factory system.

Description	Part No.
Universal Washer Bottle Kit (1.2L capacity)	10400

Cooling

Heat Transfer

Vibrant Performance Bar and Plate Intercoolers and Oil Coolers feature a unique, louvered fin design on the ambient path, which maximizes the core's available surface area, and an offset fin design on the charge air path for minimal pressure loss.

Our cores also feature industry leading fin density that vastly improves cooling efficiency, allowing for lowered charged air temperatures, maximizing charge air density gains.

Air to Air Intercooler Assemblies with End Tanks

- All Vibrant Performance Intercoolers feature Bar and Plate Construction.
- A unique louvered fin design on the ambient path maximizes the core's available surface area, and an offset fin design on the charge path allows for minimal pressure loss.
- Cast Aluminum End Tanks are precision TIG-welded to the core and pressure tested for leak-free performance.

* Each Vibrant Performance Intercooler Assembly includes a pair of Stainless Steel Easy Mount Brackets which bolt to the end tanks, making mounting the intercooler easy.

Aluminum End Tanks Assemblies

- Manufactured from 1/8" (3.2mm) thick 5052 Aluminum sheet.
- These 3-piece assemblies save fabricators time and money vs. making their own end tanks to weld to Vibrant Intercooler cores.
- Models available to fit with our most popular Intercooler core sizes but be sure to check www.vibrantperformance.com for new additions.

HD Clamps

Constructed entirely of 6061 Aluminum and featuring a tool-free, quick-release clamping mechanism, Vibrant HD Clamp Assemblies provide a leak-free, modular connection that's perfect for pressurized air applications.

These robust clamps are able to withstand operating pressures up to 800 psi and temperatures up to 400 degrees F, making them ideal for turbo charge pipe applications. HD Clamp Assemblies provide a flexible connection that withstands vibration, movements along their axis, lateral misalignment and angular deflection.

Vibrant HD Clamp System

Vibrant Performance has taken modular, flexible connectors to a whole new level with the introduction of our HD Clamp System, which is available for tube sizes ranging from 2" to 5" O.D.

- Quick Release Clamp manufactured from 6061 Billet Aluminum.
- Static burst pressure rating: 800 psi.
- Max. operating temperature: 400°F (205°C).
- Clamps available in Anodized Black, Anodized Blue and Mirror Polished.

HD Clamp - Complete Assembly

Each Vibrant Performance HD Clamp Assembly includes a Billet Aluminum Quick Release Clamp, a pair of Aluminum Weld Ferrules (with O-Rings), a hard anodized Aluminum Union Sleeve and our signature quick release Locking Pin.

To Suit Tube Size	Full Assembly w/Black Clamp Part No.	Full Assembly w/Blue Clamp Part No.	Full Assembly w/Polished Clamp Part No.

HD Clamp - Transition Weld Ferrules

In response to popular demand, Vibrant Performance introduces a brand new offering of Transition Weld Ferrules, manufactured from 6061 Aluminum and available in a wide variety of sizes, giving fabricators more options when working with Vibrant HD Clamp Assemblies.

An O-Ring seal is included with each Transition Weld Ferrule

NEW

sold individually

HD Clamp - Alignment Tool

This tool will be the first thing a fabricator will reach for when preparing to build a tube assembly that will utilize a Vibrant HD Clamp connector. This Stainless Steel Quick Release Clamp allows you to position your HD Weld Ferrules prior to welding to ensure the optimum amount of motion is available during operation.

Suitable for use with all HD Clamp Weld Ferrules.

NEW

Note: does NOT include Weld Ferrule

Silicone Connectors Hose Clamps

For many years, Vibrant Performance has boasted one of the largest offerings of premium quality, high performance multi-ply reinforced Silicone Hose Couplers in the racing and performance industry and we are proud to say that we've made our offering even more diverse to meet our customers' ever evolving needs.

Our Silicone Hoses have earned the trust of race industry professionals across the globe and have been proven, over and over again, to perform reliably in all sorts of conditions. Whether you need straight hoses, reducers or elbows; hoses designed for normal or high temperature applications or possibly something completely custom, we are your source and we offer products ranging in a huge array of standard sizes, from as small as 1/8 inch all the way to 6 inch.

4 ply ARAMID Reinforced Straight Hose Couplers

- Straight Hoses are available in 3", 12" and 36" lengths.
- All Vibrant Performance Straight Hose Couplers feature High Temperature Resistant Aramid Reinforcement Fabric between each layer of silicone which allows for an impressive Operating Temperature range of -65° F to 500° F (-54° C to 260° C).
- Wall Thickness: Nominal 0.20" (5mm).
- Suitable for Water, Coolant and Air service only.
- **Not suitable for use with Oil/Fuel.** Please contact Vibrant if you require hoses capable of being used for Oil/Fuel service.
- Available in your choice of Gloss Black and Gloss Blue (some items are available only in Gloss Black).

TECH TIP

Operating Pressure Ratings noted are determined based upon Ambient Temperatures. A hose's pressure capacity decreases, on average, by 20% for every 210°F (approx 100°C) increase in operating temperature.

Boost Brace Assemblies

Vibrant's redesigned Aluminum Boost Brace Assemblies reduce the risk of having your pressurized pipe assemblies pull apart from your clamped hose applications.

Each assembly includes a hard anodized 6061 Aluminum Brace, a pair of Weld Dowels (available in your choice of either 6061 Aluminum or 304 Stainless Steel) and a pair of durable 304 Stainless Steel M8 Button Head cap screws.

Brace Color	Dowel Material	Part No.
Black	Aluminum	12646
Blue	Aluminum	12647
Black	Stainless Steel	12648
Blue	Stainless Steel	12649

Note: An asterisk (*) denotes a new part number.

4 ply ARAMID Reinforced Charge Air Cooler (CAC) Hose Couplers

- Ideal for compensating minor misalignment as well as isolating vibration.
- The Stainless Steel Rings prevent excessive expansion of the hose due to elevated pressures.
- All Vibrant Performance Silicone CAC Hose Couplers feature High Temperature Resistant Aramid Reinforcement Fabric between each layer of silicone which allows for an impressive Operating Temperature Range of -65° F to 500° F (-54° C to 260° C). Suitable for both Hot and Cold side applications.
- Wall Thickness: Nominal 0.20" (5mm).
- Suitable for Water, Coolant and Air service only.
- **Not suitable for use with Oil/Fuel.** Please contact Vibrant if you require hoses capable of being used for Oil/Fuel service.
- Available only in Gloss Black.

4 ply ARAMID Reinforced 45° and 90° Hose Couplers

- Vibrant 45° and 90° Silicone Elbows feature tight radius bends, making them ideal for congested engine bays that are typical in late model cars.
- All Vibrant Performance Silicone Elbows feature High Temperature Resistant Aramid Reinforcement Fabric between each layer of silicone which allows for an impressive Operating Temperature Range of -65° F to 500° F (-54° C to 260° C).
- Wall Thickness: Nominal 0.20" (5mm).
- Suitable for Water, Coolant and Air service only.
- **Not suitable for use with Oil/Fuel.** Please contact Vibrant if you require hoses capable of being used for Oil/Fuel service.
- Available in your choice of Gloss Black and Gloss Blue (some items are available only in Gloss Black).

4 ply Reinforced T-Hose Couplers

- Vibrant's new selection of Silicone T-Hose Couplers are very convenient for coolant and turbo intake plumbing projects.
- Feature Polyester Fabric Reinforcement. Operating Temperature Range of -65° F to 350° F (-54° C to 177° C).
- Wall Thickness: Nominal 0.20" (5mm).
- Suitable for Water, Coolant and Air service only. **Not suitable for Oil or Fuel Service.**
- Available only in Gloss Black.

Vacuum Line Barb Fitting Assembly (for use with silicone hoses)

This convenient Vacuum Line Barb Fitting assembly is designed to be inserted into a silicone connector and provide a leak-free seal.

Simply punch an 8mm hole into your silicone connector and pop the fitting in place.

Each kit includes a CNC Machined Aluminum Barbed Fitting, Lock Nut, Washer and O-Ring seal.

For use with Vibrant Performance 3/16" (4mm) I.D. Vacuum Lines.

Part No. 12890

Hose Connector with Fitting Installed

Note: An asterisk (*) denotes a new part number.

Silicone Heater Hoses

- Vibrant Performance Silicone Heater Hoses are both flexible and durable.
- Suitable for Water, Coolant and Air Service.
- 1-ply Polyester reinforced.
- Operating Temp. Range: -65°F to 350°F (-54°C to 176°C).
- Available in 5 foot and 20 foot lengths.

Available in Gloss Black only.

Hose I.D.	Hose O.D.	5ft length Part No.	20ft length Part No.	Max Operating Pressure
1/4" (6.4mm)	35/64" (14mm)	20405	2040	85 psi
5/16" (7.9mm)	19/32" (15mm)	20415	2041	85 psi

1" (25.4mm)	1-11/32" (34mm)	20475	2047	50 psi
1-1/4" (31.8mm)	1-1/2" (38.1mm)	20485	2048	50 psi

Note: Silicone Heater Hose is NOT suitable for oil or fuel transfer.

Silicone Vacuum Hoses

Vibrant Performance Silicone Vacuum Hose is designed to avoid collapse under high vacuum operation and will not peel, crack or swell.

Bulk Rolls

Hose I.D.	Hose Length	Black Part No.	Blue Part No.
1/8" (3.2mm)	50 ft (15.2m)	2100	2100B
5/32" (4mm)	50 ft (15.2m)	2101	2101B
3/16" (4.8mm)	25 ft (7.6m)	2102	2102B
1/4" (6.4mm)	25 ft (7.6m)	2103	2103B
5/16" (8mm)	10 ft (3m)	2106	2106B
3/8" (9.5mm)	10 ft (3m)	2107	2107B
3/4" (19.1mm)	10 ft (3m)	2108	2108B

Note: Vibrant Performance Silicone Heater Hose and Silicone Vacuum Hose can be supplied in custom bulk lengths and in custom hose colors. Minimum quantity for custom orders is 500 feet per size.

Pit Packs

Part No. **2104**

Part No. **2104B**

Each Pit Pack includes:

- 5 feet of 1/8" (3.2mm) I.D. hose
- 10 feet of 5/32" (4mm) I.D. hose
- 4 feet of 3/16" (4.8mm) I.D. hose
- 4 feet of 1/4" (6.4mm) I.D. hose
- 2 feet of 3/8" (9.5mm) I.D. hose

Non-Reinforced Silicone Hose Couplers

- Ideal for air intake / low pressure applications.
- Pair of Stainless Steel worm gear clamps included with each hose coupler.
- Wall thickness: 0.18" (4.6mm).
- Available in Black only.

Straight Hose

Transition Hose

90° Elbow Hose

Straight Hose

- Hose length: 3" (76.2mm)

Pinch Clamp Tool

- Durable Steel construction.
- Works with all sizes of Vibrant Performance Stainless Steel Pinch Clamps.

Part No. **12299**

Fuel Injector Style Mini Hose Clamps (Sold in 10 packs)

- Zinc Plated Mild Steel construction.
- Rounded edges ensure clamp grips firmly without cutting the hose.
- Ideal for securing fuel, vacuum and windshield washer lines.

Clamp Range	Clamp Width	Part No.
0.28" - 0.35" (7.1mm - 8.9mm)	23/64" (9mm)	12230

Stainless Steel T-Bolt Clamp (Sold in Pairs)

- Vibrant Performance T-Bolt Clamps provide reliable, leak proof connections for all types of hose and tube assemblies.
- Always use T-bolt Clamps to secure Reinforced Silicone Couplers.
- Features 300-Series Stainless Steel construction for outstanding corrosion resistance.

Band Width: 3/4" (19mm)

Spring Loaded T-Bolt Clamps (Sold in Pairs)

- Vibrant Performance Spring Loaded T-Bolt Clamps are designed to compensate for hose fluctuations resulting from thermal and/or pressure changes that can cause a hose to expand or contract. The spring allows the clamps to adjust to provide even tension.
- Features 300-Series Stainless Steel construction for the clamp band and Floating Bridge. T-bolt, lock nut and spring are Zinc Plated Steel.
- Recommended Torque Spec: 50 in/lbs.

CLASSIC High Performance Air Filters

Vibrant Performance Classic Filters features a 4-ply cotton gauze filter element that allows for significantly more air flow than a stock filter while also providing excellent filtration of airborne particulate. Each filter is pre-oiled and is washable and reusable.

It is recommended that the filter element is cleaned every 10,000 - 15,000 miles (16,000 to 24,000 kilometers).

TECH TIP

Our Classic Series Air Filters feature an inverted cone end cap design that permits more efficient airflow.

OPEN FUNNEL High Performance Air Filters

Vibrant Performance Open Funnel Filters feature an inverted cap design which increases the filter surface area for improved air flow and excellent filtration of airborne particulate.

Note: OPEN FUNNEL Air Filters are not recommended for use on forced induction applications.

Tubing and Bends

Our comprehensive offering of premium quality Aluminum and Stainless Steel tubing and bends are consistent both dimensionally and in material composition, and require minimal preparation prior to welding.

Vibrant offers round tubing in a variety of bend angles, straight lengths and pie cut sections, in sizes ranging from 0.75" (19mm) to 5" (127mm). We also offer our very popular Oval Stainless Steel tubing, which are great for providing extra ground clearance and are available in 45° and 90° mandrel bends, straight lengths and pie cut sections.

Aluminum Tubing

Since 2001, Vibrant Performance has led the industry with our huge offering of lightweight, top quality 6061 Aluminum Mandrel Bends, Straight Tubing, Joiners and Transitions, available in a wide array of sizes ranging from 3/4" to 5" (19mm to 127mm) O.D.

Vibrant's Aluminum Tubing sets itself apart as it requires virtually no surface preparation prior to welding, making it the preferred choice of professional fabricators across many different industries. Be sure to choose Vibrant Performance for your next project!

Manual Bead Roller

This sturdy and cost effective tool makes it easy to add a professional looking bead to all types of tubing. Great for Aluminum up to 14 gauge wall thickness (0.074" or 1.9mm) and also suitable for Titanium up to 18 gauge (0.048" or 1.20mm).

Made from high quality Steel and Aluminum components, this assembly comes complete with everything you need straight out of the box, including a convenient carrying case.

TECH TIP

Always apply the bead before welding the tubing to prevent swing clearance issues. Works best when secured in a vise.

Minimum tube diameter to use on this Bead Roller is 3/4" (19mm) O.D.

Produces a bead that is approx. 1/8" (2.4mm) tall and 1/4" (6.3mm) wide.

Bead Roller

304 Stainless Steel Tubing and Mandrel Bends

Vibrant Performance offers one of the most comprehensive collections of 304 Stainless Steel Tubing and Mandrel Bends. Fabricators can always rely on Vibrant to supply tubing and bends that are consistent both dimensionally and in material composition which requires minimal preparation before welding.

U-J Mandrel Bends - 304 Stainless Steel

321 Stainless Steel Tubing and Mandrel Bends

Vibrant Performance is excited to introduce our new offering of 321 Stainless Steel Tubing and Mandrel Bends, which performs better than 304 Stainless Steel at prolonged, elevated operating temperatures (800°F to 1500°F / 427°C to 816°C), making it highly recommended for use in forced induction applications. 321 Stainless Steel also features superior corrosion resistance and withstands tensile stress and stress fractures better than 304 Stainless Steel.

180° U-Bends - 321 Stainless Steel

TECH TIP - CHOOSE THE RIGHT FILLER ROD

The following filler rod should be used when welding 321 Stainless Steel:

For Welding 321 S.S. to 321 S.S. use 347 filler rod

For Welding 321 S.S. to 304 S.S. use 308L filler rod

For Welding 321 S.S. to Mild Steel, use 309L filler rod

Please refer to page 75 of this catalog for our complete offering of Stainless Steel Filler Rods.

304 Stainless Steel Schedule 10 Weld Fittings

Vibrant Performance 304 Stainless Steel Schedule 10 Weld Fittings are ideal for use in the fabrication of turbo exhaust manifolds and downpipes. The chamfered ends allow for easy butt welding. Sch. 10 Pipe = 0.109" (2.77mm) wall thickness.

Note:

Pipes are normally identified by a Nominal Pipe Size (NPS) rather than Outside Diameter. Please refer to the "Actual I.D." and "Actual O.D." columns on the application list below to ensure you choose the correct pipes for your project.

45° Elbows

TECH TIP - MANIFOLD FLANGES OPTIMIZED FOR SCH 10

Vibrant Performance offers a large selection of Exhaust Manifold Flanges (please refer to pages 99-101 of this catalog) with port dimensions that are optimized for use with Schedule 10 pipes, making it significantly easier to build your own turbo manifold.

Exhaust Fabrication

Vibrant Performance offers one of the most expansive offerings of premium, race quality exhaust components and accessories to allow a professional fabricator to finish just about any type of exhaust project imaginable.

Whether you are looking to build a custom manifold or cat-back exhaust or you simply want to add an exhaust tip that shines like fine jewellery, we have got you covered.

Mufflers and Resonators

Vibrant Performance has one of the most complete offerings of Mufflers & Resonators in the industry, providing the ideal upgrade for virtually any type of car or truck, as well as on or off-road vehicles. Suitable for both naturally aspirated and forced induction applications.

Our "True Straight Through" internals feature a Stainless Steel perforated tube that is wrapped in our premium quality, multi-layer sound suppression materials that help produce a low, deep tone while still allowing for unrestricted flow and maximum horsepower.

Flat Black Universal Mufflers

- These stealthy mufflers are perfect for cruising under the radar and avoiding unwanted attention.
- Features 100% Stainless Steel construction.
- All Flat Black Mufflers measure 5"H x 9"W x 15"L (20" Overall Length, including the exhaust tips).

Single Outlet

STREETPOWER Universal Mufflers (with Exhaust Tips)

- Don't be fooled by the classic, subtle style of the STREETPOWER range of Universal Performance Mufflers. Their "True Straight Through" internals ensures unrestricted exhaust flow for maximum power but they also feature dense, multi-layer sound suppression materials inside each of these mufflers to help control exhaust tone and drone.
- All StreetPower Universal Mufflers feature **PREMIUM 304 Stainless Steel construction**, polished to a beautiful mirror finish. Don't settle for inferior grades of Stainless Steel. Demand the best!
- These Oval mufflers measure 5"H x 9"W x 15" Body Length (23" Overall Length).

Inlet I.D.	Tip O.D.	Part No.
2-1/2" (63.5mm)	4" (101.6mm)	1046
3" (76.2mm)	4" (101.6mm)	1042

*Round, Single Wall, Angle Cut, Rolled Edge Exhaust Tip
Tip Length = 8" (203mm)*

*Oval, Single Wall, Angle Cut, Rolled Edge Exhaust Tip
Tip Length = 8" (203mm)*

Inlet I.D.	Oval Tip Dimension	Part No.

Tip Length = 8" (203mm)*

TPV Universal Mufflers

- TPV Universal Mufflers are race inspired and designed to withstand the extreme demands of today's high performance vehicles.
- Features **PREMIUM 304 Stainless Steel construction** and are fully TIG welded for optimum durability and a superior quality finish. Don't settle for inferior grades of Stainless Steel. Demand the best!
- All TPV Mufflers feature our signature "True Straight Through" internals for unrestricted exhaust flow and maximum power gains. They are also densely packed with our superior multi-layer sound suppression materials to ensure a low, deep exhaust note.

4" O.D. Straight Cut Exhaust Tip

Inlet I.D.	Overall Length	Muffler Body Length	Tip Length	Part No.
2-1/2" (63.5mm)	22" (560mm)	14" (355mm)	6" (152mm)	1057

Exhaust Flanges - 304 Stainless Steel

Vibrant Performance 304 Stainless Steel Exhaust Flanges are available in 2-bolt and 3-bolt design (for Round Tubing) and 4-bolt design (for Oval Tubing), in a variety of sizes.

Matching Gaskets are available, manufactured from multi-layer Graphite material.

3" (76.2mm)	13292

V-Band Flange Assemblies

Vibrant Performance V-Band Flanges are the choice of industry professionals and offer an excellent Quick Release alternative to traditional flanged or slip fit tube connections.

Our V-Band Assemblies provide a gasket free seal thanks to our signature “Male-Female” flange design and superior positive retention compared to other tube coupling options.

Each full assembly includes two (2) V-Band Flanges and one (1) V-Band Clamp.

Stainless Steel V-Band Flanges and Assemblies

- Flanges manufactured from 304 Stainless Steel.
- Quick Release V-band Clamps are made entirely from 300 series Stainless Steel.

Turbo Flanges & Fittings

Vibrant Performance offers a large assortment of Turbo Inlet and Discharge Flanges, Compressor Outlet Flanges and External Wastegate Flanges for the most popular applications. Multi-Layer Metal Gaskets are available for some of our Flanges (please refer to application charts).

Turbine INLET Flanges

Flange Thickness: 3/8" (9.5mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT1241	19856	--	--

Flange Thickness: 3/8" (9.5mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT1544 (model 454082-2)	19853	--	--

Flange Thickness: 3/8" (9.5mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT1544 (model 454082-3)	19860	--	--

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT1548	1430	14300	1430G

Flange Thickness: 3/8" (9.5mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT2052	19820	--	--

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT2056, all GT22, all GT25R, all GT28R, GT3071R	1430	14300	1430G

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
All Garrett T3 Undivided Turbine Housings	1400	14000	1400G

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT3271 and all T3 Divided Turbine Inlets	1445	14450	1445G

Note: All dimensions on the provided drawings are noted in millimeters

Turbine INLET Flanges (continued)

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT3788, GT4088R, GTX4088R, GT4094R, GT4202R, GT4294R, GT4508R, GTX4508R (Divided T4 Turbine Inlet)	1442	14420	1442G

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT4088R (model 703457-2 only)	19859	--	--

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
All Garrett GT47 / GTX47, all GT50 / GTX50, all GTX55, GT60 (Undivided T6 Turbine Inlet)	1417	14170	1417G

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
All Garrett GT42 / GTX42, (Divided T6 Turbine Inlet)	1443	14430	1443G

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett GTX2860R, GTX2867R (V-Band Turbine Inlet)	19861	19861C

Application	304 S.S. Part No.	Matching Clamp Part No.
All Garrett GTX29, all GT30, all GTX30, all GT35, all GTX35 (V-Band Turbine Inlet)	1390	1416C

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett GT30 / GTX30, GT35 / GTX35 (V-Band Divided Turbine Inlet)	1391	1416C

Application	304 S.S. Part No.	Matching Clamp Part No.
TIAL Turbine Inlet for Garrett GT28 / GTX28, GT30 / GTX30, GT35 / GTX35 (V-Band Turbine Inlet)	1416	1416C

Turbine INLET Flanges (continued)

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett GTX47 Gen2, GTX50 Gen2, GTX55 Gen2 and Tial Turbine Inlet for Garrett GTX55 (SFI V-Band Turbine Inlet)	19862 *	19862C *

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett 25-550, G25-660 (T25 Turbine Inlet)	1430	14300	1430G

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett G25, G30 and G35 series Turbines (V-Band Turbine Inlet)	1390	1416C

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Generic T3/T4 and Turbonetics T3 Turbine Inlet	1431	14310	1431G

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
T4/T04 Undivided Turbine Inlet	1441	14410	1441G

Accepts 2.125" OD tube

Application	304 S.S. Part No.	Matching Clamp Part No.
All Borg Warner EFR6258, 6758, 7064 7163, 7670, 8374 & 9180 with 3" V-Band Turbine Inlet	19951	1416C

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Borg Warner EFR6758, EFR7163 (F-Type) with 4-Bolt Turbine Inlet	1430	14300	1430G

Note: An asterisk (*) denotes a new part number.

Turbine INLET Flanges (continued)

Flange Thickness: 1/2" (12.7mm)

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Borg Warner EFR7064, EFR7670 B-Type Turbine	1400	14000	1400G

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Borg Warner S-Series (Divided T4 Turbine)	19863	19864	--

Application	304 S.S. Part No.	Matching Clamp Part No.
Precision Turbo CAE 5 series and 6 series (V-Band Turbine Inlet)	1418	1416C

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Mitsubishi Evo7, Evo8 and Evo9 (Divided Turbine Inlet)	--	14020	--

Application	Mild Steel Part No.
T3 Log Style Manifold Inlet Flange (Radiused to suit Nominal 1-1/2" Schedule 10 Pipe)	11640B

Turbine OUTLET Flanges

Flange Thickness: 1/2" (12.7mm)

Flange Thickness: 3/8" (10mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT1241	19855	--	--

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT2052	19830	--	--

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Gasket Part No.
All Garrett GT25R, GT2854R, GT2859R, GT2860R (model 739548-9 only), GT2860RS, GT2871R (models 472560-15, 771847-1, 743347-1, 743347-2, 743347-3 and 743347-4), GT2876R, GT3071R and GT3076R	19872	--

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
All Garrett GT25R, GT2854R, GT2859R, GT2860R (model 739548-9 only), GT2860RS, GT2871R (models 472560-15, 771847-1, 743347-1, 743347-2, 743347-3 and 743347-4), GT2876R, GT3071R and GT3076R	1448	14480	--

Designed specifically for use with Vibrant flange # 1448/14480

Application	304 S.S. Part No.
90mm x 55mm Oval to 3" (76mm) Round Transition Weld Adapter	1448A

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Gasket Part No.
Garrett GT2860R (model 707160-5 and 707160-7 only), GT2871R (model 780371-2 and 707160-10 only)	19871	--

Note: All dimensions on the provided drawings are noted in millimeters

Turbine OUTLET Flanges (continued)

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT30/GT35 and T3 4 Bolt Outlet without Internal Wastegate (suits 3" O.D. tubing)	1438	14380	1438G

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
T3 4 Bolt Outlet without Internal Wastegate (suits 2.5" O.D. tubing)	1439	14390	1439G

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett GTX2860R, GTX2867R with V-Band Turbine Outlet (suits 2-1/8" O.D. tubing)	1390	1416C

Application	304 S.S. Part No.	Matching Clamp Part No.
Tial V-Band Turbine Housing for Garrett GT28 / GTX28, GT30 / GTX30, GT35 / GTX35 (suits 3" O.D. tubing)	1415	1415C

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett GTX29, GT30 / GTX30, GT35 / GTX35, GT40 / GTX40 90mm O.D. Flange with 81mm diameter mating ring, (suits 3" O.D. tubing)	19886	1415C

Application	304 S.S. Part No.	Matching Clamp Part No.
Garrett GT30 / GTX30, GT35 / GTX35, GT37, GT40 / GTX40 Divided Turbine models only 92mm O.D. Flange (suits 3" O.D. tubing)	19884	1415C

Flange Thickness: 1/2" (12.7mm)

Application	304 S.S. Part No.	Mild Steel Part No.	Gasket Part No.
Garrett GT3271R	--	14200	1420G

Flange Thickness: 1/2" (12.7mm)

Application

Mitsubishi Evo7 / Evo8 / Evo9
(Divorced Port Turbine Outlet)

304 S.S. Part No. **Mild Steel Part No.** **Gasket Part No.**

-- **13960 --**

Complete Kit includes:

- 4 bolt to V-Band adapter flange (#11739S)
- Matching V-Band Flange (#1491F)
- Matching V-Band Clamp (#1491C)
- Fasteners

Application

Adapts from Garrett GT30/GT35/T3
4 Bolt Turbine Outlet (3" diameter)
to a 3" V-Band

304 S.S. Part No.

11742

Designed to mate with
Vibrant V-Band Flange

Part No. 1491F

Application

GT30/GT35/T3
4 Bolt to V-Band Adapter Flange
(does not include hardware)

304 S.S. Part No. **Matching Clamp Part No.**

11739S 1491C

Part No. 10127O (Replacement O-Ring)

Note: Weld bung coped for 2-1/2" (63.5mm) O.D. tubes.

Manual Boost Controller

"Turning Up The Boost" is an easy and cost effective way to squeeze more horsepower and torque from your turbocharged vehicle.

Vibrant Performance has developed a CNC machined Manual Boost Controller that features a unique integrated Brass dial that allows you to precisely set boost, thereby reducing the risk of "overboosting" that can occur with traditional Manual Boost Controllers.

Features:

- 6061 Billet Aluminum construction with Black Anodized finish for corrosion protection.
- Includes removable barbed fittings for easy servicing and reference line upgrades.
- Includes a low pressure check valve for use on MAF equipped applications to prevent stalling at idle.
- Large, premium grade Brass Adjustment Knob allows for easy increase or decrease of boost pressure.
- Can be mounted nearly anywhere thanks to the mounting bracket included.
- 4 feet of Silicone Vacuum Hose, Zip Ties and Installation Instructions also included.

Part No. 16901

TECH TIP

If your vehicle is MAF equipped or you hear excessive noise from the Boost Controller during operation, you may opt to install the Low Pressure Check Valve that is included with your new Vibrant Performance Manual Boost Controller.

Install the Check Valve on the Charge Tube Side of the Boost Controller as it is a flow directional accessory.

Note: An asterisk (*) denotes a new part number.

Exhaust Manifold Flanges

Vibrant Performance has developed one of the largest offerings of Exhaust Manifold Flanges in the industry.

Our 3/8" (9.5mm) thick 304 Stainless Steel flanges have had their exhaust port sizing optimized for use with standard wall round tubing.

We also offer 1/2" (12.7mm) thick Mild Steel flanges that feature exhaust ports designed for Schedule 10 or Schedule 40 weld fittings.

AUDI

<i>Application</i>	<i>3/8" Thick 304 S.S. Part No.</i>	<i>1/2" Thick Mild Steel Part No.</i>
Audi 2.7T motor (2 flanges / set)	14227	14627

BMW

<i>Application</i>	<i>3/8" Thick 304 S.S. Part No.</i>	<i>1/2" Thick Mild Steel Part No.</i>
BMW E36/E46 motor (2 flanges / set)	14336	14636

FORD

Merge Collectors

All Vibrant Performance Merge Collectors feature complete 16 gauge, 304 Stainless Steel construction, precise fabrication and back purged TIG welds at every seam.

Each Vibrant Performance collector is ready to weld straight out of the box with little or no prep required. Sold individually.

4 into 1 Merge Collectors

Inlet Slipover I.D.	Merge O.D.	Transition Outlet O.D.	Overall Length	Part No.
1-3/4" (44.5mm)	2-1/2" (63.5mm)	3" (76.2mm)	10-5/8" (270mm)	10302
1-3/4" (44.5mm)	3" (76.2mm)	3-1/2" (88.9mm)	9-3/8" (238mm)	10303

Weld on Collector Tab Set - Stainless Steel

Description	Part No.
Set of S.S. Collector Tabs, (2 tabs, 1 Spring)	10340

Cast 304 Stainless Steel "Y" Collector

- A durable, cost effective solution for fabricating dual exhaust systems.
- 3.5mm Wall Thickness.

Inlet I.D.	Outlet I.D.	Collector Height	Part No.
3" (76.2mm)	Dual 2-1/2" (63.5mm)	3-1/4" (82.5mm)	11743

Turbo Manifold Merge Collectors

- Constructed from 304 Stainless Steel Schedule 10 pipe.
- Each component is precision 3D laser cut to create tight fitment.
- Each assembly is tack welded for ease of adjustability.
- Available in 4 into 1 and 6 into 1 configurations.

4 into 1 Collectors

Description / Application	Pipe O.D.	Collector Height	Collector Outlet Dimensions	Part No.
To Fit T25/T28 Inlet Flange	1-5/8" (41.3mm)	3" (76.2mm)	2-1/4" x 1-3/4" (57.2mm x 44.5mm)	2450
To Fit T25/T28 Inlet Flange	1-7/8" (47.6mm)	4-1/2" (114.3mm)	2-1/4" x 1-3/4" (57.2mm x 44.5mm)	2455
To Fit T3 and T3/T4 Inlet Flange	1-7/8" (47.6mm)	3" (76.2mm)	2-7/8" x 1-7/8" (73mm x 47.6mm)	2451
To Fit T3 Divided Inlet Flange	1-7/8" (47.6mm)	4-1/2" (114.3mm)	2-15/16" x 2-1/4" (74.7mm x 57.2mm)	2465
To Fit T4 Inlet Flange	1-7/8" (47.6mm)	4-3/4" (120.7mm)	3-1/16" x 2-1/2" (77.8mm x 63.5mm)	2453
To Fit T4 Divided Inlet Flange	1-7/8" (47.6mm)	4-1/2" (114.3mm)	2-15/16" x 2-1/4" (74.7mm x 57.2mm)	2466
To Fit Inlet Flange on GT28/30/35 with Tial Turbine Housing	1-7/8" (47.6mm)	4-1/2" (114.3mm)	Ø2-1/8" (54mm)	2457

6 into 1 Collector

Description / Application	Pipe O.D.	Collector Height	Collector Outlet Dimensions	Part No.
To Fit T4 Inlet Flange	1-7/8" (47.6mm)	4-1/4" (108mm)	2-15/16" x 2-1/4" (74.7mm x 57.2mm)	2458

TECH TIP

Vibrant Performance offers a large selection of 304 Stainless Steel Schedule 10 weld fittings, which are ideal for building durable Turbo Manifolds. Please refer to page 79 to see our complete offering.

Stainless Steel Flexible Couplings

Vibrant is a world leader in the design and manufacturing of Stainless Steel Flexible Couplings. Vibrant Flex Couplings offer an elegant solution for the absorption of thermal motion, as well as isolating vibration generated by the engine, relieving stress on a vehicle's exhaust system. They effectively reduce the risk of premature failure of manifolds and downpipes while extending the service life of other components.

Electropolished Bellows Assemblies with Directional Flow Solid Liner

- Now available in both 321 Stainless Steel (for high temperature applications) and 304 Stainless Steel.

Inlet / Outlet I.D.	Length	321 S.S. Part No.	304 S.S. Part No.
1-1/2" (38.1mm)	2-3/4" (69.9mm)	69327 *	--
1-3/4" (44.4mm)	2-1/2" (63.5mm)	69425 *	--
1-7/8" (47.6mm)	2-3/4" (69.9mm)	69527 *	68527
2" (51.3mm)	3-1/4" (82.6mm)	69632 *	68632
2-1/4" (57.2mm)	3" (76.2mm)	69683 *	68683
2-1/2" (63.5mm)	4" (101.6mm)	69724 *	--
3" (76.7mm)	4" (101.6mm)	69834 *	--
3-1/2" (88.9mm)	4" (101.6mm)	--	68935
4" (101.6mm)	4" (101.6mm)	--	68944

321 S.S. is the Best Choice for Pre-Turbo Applications
(e.g. Manifolds, Crossover Pipes)

TurboFlex Couplings (with Interlock Liner)

Not recommended for Pre-Turbo Installation.

Vibrant's Turbo Flex Coupling features an internal Stainless Steel Interlock Liner to facilitate smooth flow and also protects the bellows from direct exposure to high temperature exhaust gases. Recommended for all high flowing, high temperature applications (e.g. forced induction).

Inlet / Outlet I.D.	Length	Part No.
1-3/4" (44.5mm)	4" (101.6mm)	60404
2" (50.8mm)	4" (101.6mm)	60604
2" (50.8mm)	6" (152.4mm)	60606
2-1/4" (57.2mm)	4" (101.6mm)	60704
2-1/2" (63.5mm)	4" (101.6mm)	60804
2-1/2" (63.5mm)	6" (152.4mm)	60806
2-1/2" (63.5mm)	8" (203.2mm)	60808

Inlet / Outlet I.D.	Length	Part No.
3" (76.2mm)	4" (101.6mm)	61004
3" (76.2mm)	6" (152.4mm)	61006
3" (76.2mm)	8" (203.2mm)	61008
3" (76.2mm)	10" (254mm)	61010
3-1/2" (88.9mm)	8" (203.2mm)	61108
4" (101.6mm)	8" (203.2mm)	61208
4" (101.6mm)	10" (254mm)	61210
5" (127mm)	8" (203.2mm)	61408

Note: An asterisk (*) denotes a new part number.

Standard Flex Couplings (with Internal Braid Liner)

Vibrant Flex Couplings with Inner Braid Liner provide smooth flow while retaining flexibility in the coupling itself. The Inner Braid protects the Bellows from premature failure due to high temperature exhaust gas exposure, and is ideal for eliminating "whistling" caused by high velocity flowing media.

Best Suited For Naturally Aspirated applications.
Not recommended for Forced Induction applications.

Inlet / Outlet I.D.	Length	Part No.
1-1/2" (38.1mm)	4" (101.6mm)	62304
1-1/2" (38.1mm)	6" (152.4mm)	62306
1-3/4" (44.5mm)	4" (101.6mm)	62404
1-3/4" (44.5mm)	6" (152.4mm)	62406
2" (50.8mm)	4" (101.6mm)	62604
2" (50.8mm)	6" (152.4mm)	62606
2" (50.8mm)	8" (203.2mm)	62608

Inlet / Outlet I.D.	Length	Part No.
2-1/4" (57.2mm)	4" (101.6mm)	62704
2-1/4" (57.2mm)	6" (152.4mm)	62706
2-1/4" (57.2mm)	8" (203.2mm)	62708
2-1/2" (63.5mm)	4" (101.6mm)	62804
2-1/2" (63.5mm)	6" (152.4mm)	62806
2-1/2" (63.5mm)	8" (203.2mm)	62808
3" (76.2mm)	4" (101.6mm)	63004
3" (76.2mm)	6" (152.4mm)	63006

Standard Flex Couplings (No Inner Liner)

Where operating exhaust temperatures or exhaust flow velocity is not a concern, our Standard Flex Couplings (without Inner Liner) offer a cost effective solution for isolating vibration and protecting a vehicle's exhaust components from damage.

Best Suited For Naturally Aspirated applications.
Not recommended for Forced Induction applications.

Inlet / Outlet I.D.	Length	Part No.
1-1/2" (38.1mm)	4" (101.6mm)	64304
1-3/4" (44.5mm)	4" (101.6mm)	64404
2" (50.8mm)	4" (101.6mm)	64604
2-1/4" (57.2mm)	4" (101.6mm)	64704
2-1/2" (63.5mm)	6" (152.4mm)	64806
3" (76.2mm)	6" (152.4mm)	65006

TECH TIP - LET VIBRANT HELP YOU PICK THE RIGHT FLEXIBLE COUPLING

When choosing the right Vibrant Performance Flexible Coupling for your application, it is important to note that factors like the grade of Stainless Steel used, the thickness of the bellows, the number of convolutions, the corrugation height and pitch as well as operating temperatures, flow velocity and movement are critical considerations when selecting the appropriate Flex Coupling that will fit and function as desired. When in doubt on how to pick the right flex coupling for your project, please contact our technical team for their expert advice at tech@vibrantperformance.com.

Oxygen Sensor Weld Bungs

Description	Thread Pitch	Material	Package Quantity	Part No.

Specialty Sensor Bung Adapter Fittings

- The Male end of these adapter fittings are designed to thread into an M18 x 1.5 Female Exhaust Sensor Bung.
- Manufactured entirely from 304 Stainless Steel

Description	Thread	Package Quantity	Part No.
Thread-On Sensor Bung Adapter with Interchangeable Inserts	Male M18 x 1.5 to Female M18 x 1.5	1 set / bag	11621

Description	Thread	Package Quantity	Part No.
Thread-On "J-Style" Sensor Bung Adapter with Interchangeable Inserts	Male M18 x 1.5 to Female M18 x 1.5	1 set / bag	11619

Description	Material	Package Quantity	Part No.
Hardware kit for 11619 and 11621	304 Stainless Steel	1 set / bag	11622 *

TECH TIP Start with the largest insert and work your way down to the smallest until you achieve the desired outcome.

Oxygen Sensor Socket Tool

This cut-away Socket Tool is designed to clear the O2 Sensor Wire and simplifies the installation or removal of an Oxygen Sensor.

Description	Part No.
O2 Sensor Socket Tool (with 3/8" drive receiver)	11148

EGT Sensor Weld Bungs and Plugs

Description	Thread Pitch	Material	Package Quantity	Part No.
EGT Sensor Weld Bung	Female 1/8" NPT	304 Stainless Steel	1 / bag	1197
EGT Sensor Weld Bung	Female 1/8" NPT	Gr. 5 Titanium	1 / bag	1197T
EGT Sensor Bung Plug	Male 1/8" NPT	Zinc Plated Mild Steel	1 / bag	11147

300 Series Stainless Steel Exhaust Hanger Rods

Hanger Rod O.D.	Overall Length	Quantity	Part No.
3/8" (9.5mm)	9" (228.6mm)	10 / pack	11898
1/2" (12.7mm)	9" (228.6mm)	10 / pack	11899

* Please refer to page 117 for our complete offering of Titanium Hanger Rods

Exhaust Hanger Rod Clips

Vibrant Hanger Rod Clips, made from Delrin®, fill the gap when a Hanger Rod and a Rubber Hanger does not fit snugly. Installation of these Hanger Rod Clips minimize the ability for a Rubber Hanger to slide freely back and forth along a hanger rod, thereby reducing unwanted exhaust system movement.

Description	Package Quantity	Part No.
Clips for 3/8" O.D. (9.5mm) Hanger Rods	2 / bag	1198C
Clips for 1/2" O.D. (12.7mm) Hanger Rods	2 / bag	1199C

Note: An asterisk (*) denotes a new part number.

Torca® TC Series Stainless Steel Butt Joint Couplers

TC Series Butt Joint Clamps provide a high-performance sleeve clamp solution for joining equal sized exhaust system components without the need for resizing or slotting. Features 409 Stainless Steel construction. **Recommended torque: 48+/-7Nm (Static Torque)**

Application	Part No.
For use with 2-1/2" (63.5mm) O.D. Tubing	1171
For use with 2-3/4" (69.9mm) O.D. Tubing	1176
For use with 3" (76.2mm) O.D. Tubing	11730
For use with 3-1/2" (88.9mm) O.D. Tubing	1177

Torca® Easy Seal Stainless Steel Sleeve Clamps

Easy Seal Clamps provide simple and cost effective connection of exhaust components. No need to separate tubing before clamping. **Recommended torque: 65-80Nm (Static Torque).**

Application	Joint Style	Part No.
For use with 2" (50.8mm) O.D. Tubing	Butt Joint	1179
For use with 2-1/4" (57.2mm) O.D. Tubing	Butt Joint	1170
For use with 3" (76.2mm) O.D. Tubing	Butt Joint	1172
For use with 3" (76.2mm) O.D. Tubing	Lap Joint	1627T *
For use with 3-1/2" (88.9mm) O.D. Tubing	Butt Joint	1174
For use with 4" (101.6mm) O.D. Tubing	Butt Joint	1178

Torca® AccuSeal Stainless Steel Exhaust Clamps

Accuseal Clamps provide a unique seal and the ability to withstand high clamping loads without permanently distorting exhaust components. They allow the flexibility to disassemble for future service. Made from 409 Stainless Steel. **Recommended torque: 55+/-8Nm (Static Torque).**

Application	Band Width	Part No.
For use with 2" (50.8mm) O.D. Tubing	1" (25.4mm)	1163
For use with 2-1/4" (57.2mm) O.D. Tubing	1" (25.4mm)	1164
For use with 2-1/2" (63.5mm) O.D. Tubing	1" (25.4mm)	1166
For use with 2-3/4" (69.9mm) O.D. Tubing	1" (25.4mm)	1169
For use with 3" (76.2mm) O.D. Tubing	1" (25.4mm)	1167
For use with 3-1/2" (88.9mm) O.D. Tubing	1" (25.4mm)	1162
For use with 4" (101.6mm) O.D. Tubing	1-1/4" (31.8mm)	1168

Stainless Steel V-Band Clamps

Quick Release V-band Clamps are made from 300 series Stainless Steel. **Recommended torque: 36-48 in.lbs**

To Suit V-Band Flange O.D.	Corresponding Tube Size	Part No.
2-3/16" (55.4mm)	For 1-1/2" (38.1mm) O.D. tubing	1486C
2-7/16" (62.2mm)	For 1-3/4" (44.5mm) O.D. tubing	1487C

TECH TIP

Use hand tools only for assembly/disassembly.

Description	Part No.
Replacement Fastener Set for Vibrant V-Band Clamps	11146K

Note: An asterisk (*) denotes a new part number.

J-Spec Exhaust Manifold Outlet Flange Kit

Vibrant J-Spec Exhaust Manifold Outlet Flange Kits are designed to simplify the installation of any manifold with a 2-1/2" diameter outlet. This kit consists of a 2-bolt connecting flange (with a flared outlet neck) and a 2-1/2" I.D. donut style Graphite Gasket.

This flange kit will work with OE or aftermarket Spring Bolts.

Note: Center to Center measurement on the 2-bolt flange is 4-3/4" (120.7mm)

Part No. **2599**

* Donut Gasket also sold separately part # 2599B

Multi Layer Graphite Exhaust Gaskets

- Refer to Page 86 of this catalog to find the matching Stainless Steel Flanges for these Gaskets and all corresponding dimensional data.

Titanium

Titanium has long been used in the Aerospace and Motorsports industries due to its outstanding strength to weight ratio. Those characteristics make Titanium the ideal raw material for professional fabricators looking to build durable and ultra-lightweight high performance induction and exhaust components that can stand up to the rigors of racing.

Best of all, Vibrant makes Titanium more affordable and more easily accessible than it has been in the past. Make Vibrant Performance your choice for all your Titanium fabrication components!

Tubing and Bends

HD Flange Weld Ferrules

A close-up photograph of a titanium flange assembly. It shows a large, circular flange with a thick, raised lip. The surface is highly reflective, showing bright highlights and deep shadows. The flange is connected to a pipe, and the weld joint is visible.

Mufflers and Resonators

A photograph of a cylindrical titanium muffler or resonator. The component has a smooth, polished surface and a flange at one end. It is shown in a close-up, highlighting the precision of the manufacturing.

Pie Cuts

A photograph of a titanium pipe with several circumferential welds. The welds are visible as raised, textured lines around the pipe. The pipe is shown in a close-up, highlighting the quality of the welding.

Titanium V-Band Flange Assemblies

Vibrant Performance Titanium V-Band Flanges are precision CNC machined from CP2 Grade Titanium.

Like all Vibrant Performance V-Band flanges, our Titanium flanges feature a unique "Male/Female" locking design to allow for a gasket free seal and to ensure proper alignment inside the clamp.

Our Full Assemblies consist of a pair of CP2 Grade Titanium Flanges packaged with a 300 series Stainless Steel Quick Release V-Band Clamp. Male and Female flanges are also sold separately and can be coupled with Vibrant's equivalent size Stainless Steel and Aluminum V-band flanges.

Note: Our Full Offering of HD Clamps and related components are found on pages 48-49

Titanium HD Weld Ferrules are sold individually

Note: An asterisk (*) denotes a new part number.

Titanium Slip Joint Connector Sleeves

- Manufactured from 1mm (0.039") thick CP1 Titanium.
- Facilitates low profile joints for maximum ground clearance and are an excellent way to transition from Stainless Steel to Titanium.
- Each Slip Joint is pre-slotted for easy clamping. We recommend Torca® Accuseal Clamps to ensure a leak free connection. Please refer to page 108 of this catalog for our offering of Torca® clamps.

Titanium Universal Mufflers with Exhaust Tip

- All Vibrant Ti Universal Mufflers are manufactured entirely from CP1 Grade Titanium.
- Features a "True Straight Through" perforated Titanium core to ensure unrestricted exhaust flow.
- All Vibrant Ti Mufflers are densely packed with our premium, high temperature resistant sound absorption packing materials for a desirable low deep exhaust note.

NEW

304 Stainless Steel Muffler Body Clamp

Features a thick rubber liner to prevent scratching or damaging your Titanium Muffler. Also allows for welding of Stainless Steel Hanger Rods.

Description	Part No.
Clamp for 4-1/4" O.D. (108mm) Mufflers	17116
Clamp for 5-1/2" O.D. (138mm) Mufflers	17117
Clamp for 6-1/4" O.D. (160mm) Mufflers	17119

CP1 Titanium Hanger Rods

These ultra-lightweight hollow Titanium Hanger Rods are easily formed by hand with a lever style bending tool. Sold in Pairs.

Rod O.D.	Rod Length	Part No.
3/8" (9.5mm)	10" (250mm)	11890A
1/2" (12.7mm)	10" (250mm)	11891A

Sold In Pairs

Heat and Acoustic Solutions

High-Performance vehicles and excessive heat have always gone hand in hand but those elevated engine temperatures can have a ripple effect that can negatively impact power output as well as put critical components at risk of premature or catastrophic failure.

Vibrant Performance offers a wide variety of heat protection solutions that deliver reliable and cost-effective results, helping your vehicle and your expensive components avoid the ravages of heat damage.

Pre-Formed Heat Shields

- 119 DCI SheetHot and SheetHot Extreme Heat Shields
- 120 Accoustic Shields
- 121 Wire and Hose Protection
- 121 Spark Plug Boot Covers

Heat Shielding Solutions

Vibrant Performance has teamed up with DCI Performance Products™ to bring their industry leading Heat Shielding products from their home in Australia to the North American High Performance aftermarket. DCI has been making a name for themselves as a respected Tier 1 and Tier 2 OEM supplier of shielding solutions for many of the world's leading car and off-road vehicle manufacturers and their shields have become a staple for many top race teams around the world. Their patented technology allows them to create superior Heat and Acoustic Shields that are lightweight, recyclable, easy to install and cost effective.

Heat Shields

Don't let heat affect the integrity of your car or the quality and comfort of your ride. DCI's SHEETHOT™ range of Heat Shields protect your vehicle and its components from heat damage and prevents heat transfer to the interior.

SHEETHOT™ TF-600 Heat Shield

TF-600 Heat Shields are engineered for use on underbody components where rigid and robust shielding is required. These formable but highly rigid shields feature 6-layer dimpled Aluminum Material.

Description	Sheet Size	Maximum Temperature	Part No.
TF-600 Heat Shield – Large Sheet	26-3/4" x 17" (680mm x 430mm)	1100°F (600°C)	25600L
TF-600 Heat Shield – Small Sheet	11-3/4" x 9" (300mm x 230mm)	1100°F (600°C)	25600S

SHEETHOT™ TF-400 Heat Shield

TF-400 Heat Shields are the ideal choice when easy manipulation of the shielding is necessary. They feature 4-layer dimpled Aluminum Material.

Description	Sheet Size	Maximum Temperature	Part No.
TF-400 Heat Shield – Large Sheet	26-3/4" x 17" (680mm x 430mm)	1100°F (600°C)	25400L
TF-400 Heat Shield – Small Sheet	11-3/4" x 9" (300mm x 230mm)	1100°F (600°C)	25400S

SHEETHOT™ TF-100 Heat Shield

TF-100 Heat Shields provide a cost effective solution for areas with significant air flow. These lightweight and highly formable flat sheets feature a single layer of Aluminum Material.

Description	Sheet Size	Maximum Temperature	Part No.
TF-100 Heat Shield – Large Sheet	26-3/4" x 17" (680mm x 430mm)	950°F (510°C)	25100L

SHEETHOT™ FLEX ADHESIVE

Ideal for shielding areas of your vehicle where mechanical fasteners can't be used, such as Fuel Tanks and certain Engine Bay components. The adhesive backing on these Aluminized Fiberglass sheets makes their installation very easy. They are highly flexible and are ideal for dealing with radiant heat.

Description	Sheet Size	Maximum Temperature	Part No.
Flex Adhesive Heat Shield – Roll	39-1/4" x 20" (1000mm x 500mm)	490°F (255°C)	25200L

TECH TIP - BEST PRACTICES FOR HEAT SHIELD INSTALLATION

- Use a cardboard template to determine the shape, size and form of the required shield.
- When cutting your template, always add an extra 3/8" (approximately 10mm) on all sides to allow for folding the edges.
- Use Sharp Scissors or Tin Snips to cut these shields.
- Fold the edges of the shield before forming/shaping to prevent layer separation, increase strength and to avoid cutting yourself.
- Mechanical Fasteners (such as Screws, Bolts, Pop Rivets and Clamps) are recommended for securing these shields.
- Whenever possible, allow a 3/8" to 3/4" (10mm to 20mm) air gap between the shield and the component being shielded.
- Always wear Safety Gloves and Glasses whenever working with these shielding materials.
- Neither Vibrant Performance, nor DCI Performance Products accepts responsibility for any harm caused by improper use of these shields.

XT-1000, XT-5000 and ULTIMATE Heat Shields

Extreme heat can affect your car's output as well as potentially causing serious damage to vehicle components. SHEETHOT EXTREME™ Heat Shields deliver an effective solution, protecting your car from heat damage and allowing you to maximize performance and longevity. Ideal for Exhaust Manifolds and Turbo Systems.

Description	Construction	Sheet Size	Maximum Temperature	Part No.
SheetHot Ultimate - Large Sheet	Stainless Steel Composite Material	27-1/2" x 11-1/4" (700mm x 285mm)	2190°F (1200°C)	25015L
SheetHot Ultimate - Small Sheet	Stainless Steel Composite Material	11-3/4" x 9" (300mm x 230mm)	2190°F (1200°C)	25015S
SheetHot XT-5000 - Large Sheet	Multi-Ply Aluminized Mild Steel	27-1/2" x 11-1/4" (700mm x 285mm)	1830°F (1000°C)	25000L
SheetHot XT-1000 - Large Sheet	Single-Ply Aluminized Mild Steel	31" x 11-1/2" (790mm x 290mm)	1650°F (900°C)	25010L

Pre-Formed Heat Shields

SHEETHOT™ Pre-Formed Heat Shields allow for easy mounting directly to straight and bent tubing. Made from the same material as the TF-600 SHEETHOT™ heat shield (6 layer dimpled Aluminum).

Description	Length	Maximum Temperature	Part No.
Pipe Shield for 2" to 3" O.D. Straight Tubing	12" (305mm)	1100°F (600°C)	25312
Pipe Shield for 2" to 3" O.D. Straight Tubing	24" (610mm)	1100°F (600°C)	25324
Pipe Shield for 5" O.D. Straight Tubing	18" (457mm)	1100°F (600°C)	25527

Description	Length	Maximum Temperature	Part No.
90° Pipe Shield for 2" to 3" O.D. Straight Tubing	18" (457mm), 8" CLR	1100°F (600°C)	25390
90° Pipe Shield for 5" O.D. Straight Tubing	20" (508mm), 11" CLR	1100°F (600°C)	25591

Application Specific Heat Shield Kits

Application	Part No.
Fits Chevrolet C7 Corvette	25660 *
Fits 1967-69 Chevrolet Camaro (1st Gen) (also fits Pontiac Firebird F-Body)	25670 *
Fits 2015 to 2019 Ford Mustang S550 (6th gen)	25680 *

Ford Mustang kit

Acoustic Shields

Don't let irritating noises affect ride quality and comfort! DCI'S QUIETSHEET™ Acoustic Shields significantly reduce unwanted noise from making its way into your vehicle's cabin and will make driving a significantly more enjoyable experience.

Description	Length	Maximum Temperature	Part No.
Acoustic Shield	30" x 26-3/4" (762mm x 680mm)	390°F (200°C)	25770L

Note: An asterisk () denotes a new part number.*

Wire and Hose Protection

Flexible Split Sleeving

Available in black only.

Nominal Size	Sleeve Length	Part No.
1/4" (6.4mm)	10 ft. (3.1m)	25800
1/2" (12.7mm)	10 ft. (3.1m)	25801
3/4" (19.1mm)	10 ft. (3.1m)	25802
1" (25.4mm)	5 ft. (1.5m)	25804
1-1/2" (38.1mm)	5 ft. (1.5m)	25806

Lightweight and easy to install due to the unique self-wrapping Split Braid that allows you to add or remove wires, hoses or cables without disassembly. No need for fasteners like cable ties or tape, as these sleeves feature a 25% edge overlap and allow for tight radius bending without distorting.

Use a Hot Knife to cut this sleeving to prevent fraying.

Heat Protect Flexible Sleeving

Available in black only.
Sold in 5ft. lengths.

Nominal Size	Use with AN Hose	5' Length Part No.
1/2" (12.7mm)	-4	25810
5/8" (15.9mm)	-6	25815
3/4" (19.1mm)	-8	25811
7/8" (22.2mm)	-10	25812
1" (25.4mm)	-12	25813
1-1/4" (31.8mm)	-16	25816
1-1/2" (38.1mm)	-20	25817

These Silicone wrapped Fiberglass Sleeves provide protection from ambient temperatures up to 500°F (260°C).

This sleeving is highly flexible and engineered to protect hoses, cables and wire harnesses from damage caused by exposure to extreme heat, open flame and weld sparks, as well as containing radiant heat. Resists automotive chemicals and solvents, and provides protection from abrasion, punctures and moisture.

EXTREMESHIELD 1200 Flexible Tubing

Available in Silver Only.

Nominal Size	Sleeve Length	Part No.
1/2" (12.7mm)	5 ft. (1.5m)	25820
3/4" (19.1mm)	5 ft. (1.5m)	25821
1" (25.4mm)	5 ft. (1.5m)	25822
1-1/4" (31.8mm)	5 ft. (1.5m)	25823
1-1/2" (38.1mm)	5 ft. (1.5m)	25824

EXTREMESHIELD 1200 Flexible Tubing provides easy slip-on installation and offers outstanding protection for your wires, hoses and cables from temperatures up to 1200°F (650°C).

Features an Aluminized Heat Shield that is laminated onto tightly braided Fiberglass Insulation which provides superior protection from radiant heat. This tubing is not expandable so be sure to measure your application carefully.

EXTREMESHIELD 1400 Flexible Reflective Wrap

Available in Silver Only.

Nominal Size	Sleeve Length	Part No.
1/2" (12.7mm)	4 ft. (101.6mm)	25830
3/4" (19.1mm)	4 ft. (101.6mm)	25831
1" (25.4mm)	4 ft. (101.6mm)	25832
1-1/4" (31.8mm)	4 ft. (101.6mm)	25833
1-1/2" (38.1mm)	4 ft. (101.6mm)	25834

EXTREMESHIELD 1400 Thermal Wrap allows for easy installation on lines and hoses that are difficult to disassemble. Features an Aluminized outer layer that is bonded to insulating, self-wrapping Fiberglass. Simply wrap the split tubing around your components and seal it with the included "peel and stick" high temperature self-adhesive strip. Designed to withstand and reflect temperatures up to 1400°F (760°C).

Can be cut to size with a simple pair of scissors.

Spark Plugs Boot Insulation Sleeves

Protect your Spark Plug Wires at the connection to the boot with these easy, slip on braided Fiberglass Insulation Sleeves. Protects up to 1200° F (650°C) and requires minimal clearance from the heat source.

Nominal Size	Quantity	Color	Part No.
3/4" (19.1mm)	4 / pack	Natural	25890
3/4" (19.1mm)	4 / pack	Black	25891

Stainless Steel Cable Ties

Ideal for installing/securing heavy duty and high temperature sleeving.

Size	Quantity	Part No.
7-1/2" (190mm) long	10 / pack	25895
14-1/2" (368mm) long	10 / pack	25898

Private Label Programs

Your Idea + Vibrant 's Private Label Team = SUCCESS

Are you spending too much time each day manufacturing existing products and not enough time working on the next big idea that will propel your business to future success? Let the Vibrant Performance Private Label team help!

Our experienced team of project managers and technical staff will work with you to deliver top quality products at competitive prices. Our capabilities are diverse and we always have the production capacity to handle your project, be it big or small.

Our specialties include:

- CNC Machining
- Laser Cutting
- Tube Bending
- Logistics & Warehousing
- Casting & Forging
- Stamping / Forming
- Custom Rubber Hose
- Product Design Support
- Design / Build Exhaust Systems, Air Intakes & Turbo Kits
- Custom Flexible Metal Hose
- Packaging Design & Production

Email us at info@vibrantperformance.com if you wish to learn more about our private label services.

Large Volume Programs

Vibrant Performance can support your large volume components needs

Vibrant Power Inc., the corporate parent of Vibrant Performance has supplied key intake and exhaust components to original equipment manufacturers in over 50 countries. These partnerships are built on the timely, and reliable supply of high-quality products. Should you ever have the need for items in volume, we invite you to inquire about our related programs and to also learn how you can benefit from a strategic partnership with Vibrant Power Inc.

Our services include:

- Time to Market Efficiencies
- Competitive Pricing
- Made-to-Order
- Quality Control
- Distribution & Logistics
- Parts Availability

To learn more about how we can help you gain access to our large volume services, email us today at sales@vibrantperformance.com

Custom Design

Using Solid Works 3D design software, Vibrant Power's Technical team works closely with our customers to provide a solution for specific and often unique product applications. We will work with you to ensure that your products are designed to achieve optimal performance in the areas of pipe motion, vibration isolation, thermal movement, heat transfer, and sound attenuation.

Rapid 3D Prototyping and Printing

Rapid Printed Prototype

Vibrant Power has the capability of transforming 3D CAD drawings into physical sample parts. Using FDM (Fused Deposition Molding) Technology, we can produce accurate rapid prototypes, product mock-ups or accurate functioning concept models. These prototypes can be used to validate the finished product specs before commencing full-scale production.

Finished Product

From concept to finished product, our rapid prototyping printing capabilities allow us to design, quote, develop and manufacture a finished product for our customers accurately and on time.

Male NPT Identification Chart

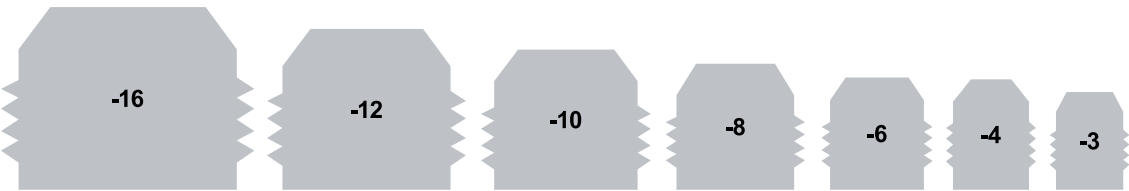

The silhouette images below depict the actual sizes of the various common NPT thread sizes. If you are unsure as to what thread size you are using, lay your fitting over the appropriate silhouette to determine its size.

Male AN/ORB Adapter Identification Chart

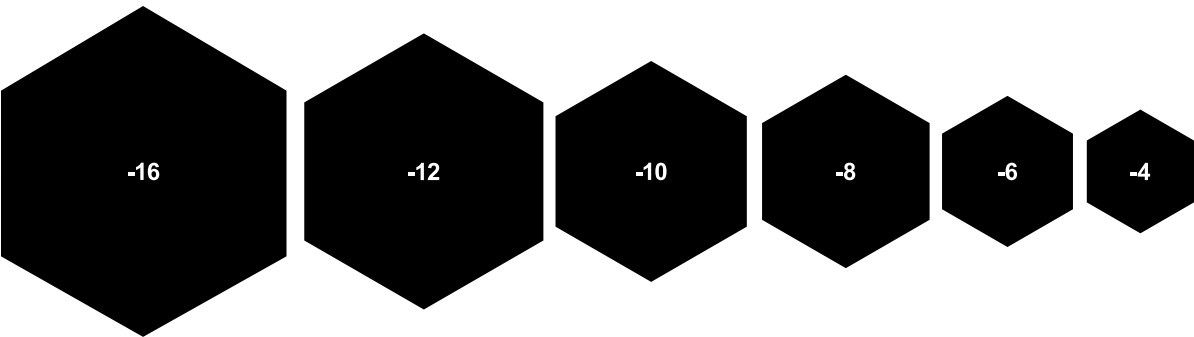

The silhouette images below depict the actual sizes of the various common AN/ORB thread sizes. If you are unsure as to what thread size fitting you are using, lay your fitting over the silhouette drawing to determine its size.

Please Note: AN and ORB threads are the same diameter. AN seals with the flare, ORB seals with an o-ring.

AN Hex O.D. Identification Charts

The silhouette images below depict the actual hex sizes of the various common types of fittings, hose ends and adapters. The number is SAE spanner size equivalent.

NPT (National Pipe Thread)

Thread Size	Threads Per Inch	Closest AN Size
1/16"	27	-3
1/8"	27	-4
1/4"	18	-6
3/8"	18	-8

PTFE Flex Hose Assembly Instructions

Please refer to page 14 for Vibrant's complete offering of PTFE lined Flexible Race Hoses

Using Vibrant Cutting shears (#2989), cut hose to length. To achieve a clean cut, wrap hose with Vibrant Clean Cut Tape (#2971) before cutting. Trim any stray strands of braid after cutting.

After cutting, inspect the inside of the hose to ensure the inner PTFE liner is not ovalized as this will cause difficulties with assembly.

If PTFE liner is ovalized, use the end of the fitting to gently massage liner back into round, being careful not to expand the liner past its original outside diameter.

Fully push / rotate the socket nut over the braided hose. Remove any tape left over from the cutting step.

Insert Aluminum olive provided between outer braid and PTFE tube. Make sure no braid is trapped between the PTFE liner and olive. Fully install olive onto hose using a hard surface or an olive tool.

Ensure PTFE tube is flat/square against internal seat of olive insert to achieve a proper seal.

Using a PTFE sealant paste, lubricate threads and male nipple, then carefully insert hose end into liner and thread socket nut until snug. Clock the hose end to the desired orientation before tightening socket nut.

Place hose end in Vibrant Aluminum Vise Jaws (#20990) to protect it from damage. Supporting the hose end in the desired clocked position, tighten socket nut to the hose end with Vibrant AN Wrench (#20993), ensuring no more than 1mm gap is achieved.

Standard Synthetic Rubber Lined Flex Hose Assembly Instructions

Please refer to pages 10-11 for Vibrant's complete offering of standard, synthetic rubber lined Flexible Race Hoses

To achieve a clean/square cut, start by wrapping the braided flex hose with Vibrant Clean Cut Adhesive Tape.

If cutting Stainless Steel Braided Hose, use Vibrant White Adhesive Tape (Part #2970) before cutting.

If cutting Nylon Braided Hose, first wrap a layer of our Clear, Non-Stick Adhesive Film (Part #2971) where you plan to make the cut, and then apply a layer of our White Adhesive Tape (#2970) before cutting.

Use Vibrant Cutting Shears (Part #2989) to cut flex hose to length.

Remove Adhesive Tape after cutting the hose to length. Be sure to trim any stray strands of braid and clean any debris from inside the hose.

Ensure the socket nut is fully seated on the braided flex hose, with no gap between the end of the hose and the shoulder of the socket nut ("S-Nut").

Lubricate the hose end adapter nipple to prevent the hose from pushing out the back of the "S-Nut" during assembly.

By hand, thread the hose end into the hose to avoid damaging the threads.

Use Vibrant Aluminum Vise Jaws (Part #20990) to hold the "S-Nut", and a Vibrant Adjustable AN Wrench (Part #20993) to tighten the Body Nut ("B-Nut") down to the "S-Nut".

Leave approximately a 1mm gap between the "B-Nut" and "S-Nut".

Do not bottom out the nuts when tightening to avoid the risk of snapping the fitting.

TECH TIP - SERVICING YOUR FLUID DELIVERY LINES

- Be sure to check the condition of your fluid delivery system on a regular basis to ensure worry free operation.
- Hose lines left sitting with fuel inside them can deteriorate over time, potentially leading to premature failure.
- At a minimum, inspect your fluid delivery system annually but we recommend doing a thorough inspection prior to any race event.

How To Pick The Right Muffler or Resonator

When choosing the right muffler or resonator for your application, we recommend taking three main criteria into consideration:

SIZE, PLACEMENT AND AVAILABLE SPACE

Size

Referring to the Vibrant Performance Selection chart, all mufflers and resonators are grouped by inlet/outlet size, then sorted by increasing sound absorption effectiveness. Inlets/Outlets are sized by the inside diameter.

All Vibrant resonators and mufflers feature our "True Straight Through" Stainless Steel perforated core design which minimizes exhaust gas flow disruption. As an added bonus, they are not flow directional.

The general rule of thumb with Vibrant Performance mufflers and resonators is that the larger the muffler/resonator body, the more effective it will be at reducing decibel levels, exhaust drone, rasp, etc.

Our selection chart organizes our wide array of mufflers and resonators from least to most sound suppressive. Resonators are typically the most compact but least sound suppressive. They are geared towards attenuating drone frequencies in tight spaces. Larger body mufflers, feature a greater volume of sound absorption material, allowing them to attenuate a broader range of frequencies. Mufflers can be used in place of resonators when drone and sound levels are excessive and the available space permits their use.

Our range of bullet style resonators have always been a popular choice, especially where space is very limited. When drone is quite excessive but space is somewhat limited, we strongly recommend the use of our Ultra Quiet oval body resonators which offer an effective sound suppression solution in a fairly small package.

Placement

For most applications we recommend placement of a resonator in the area under the front seats of the vehicle. Targeting this placement will be effective for drone frequencies that are exhibited at low to mid-range steady state throttle/engine load conditions (i.e. highway driving). Keeping the resonator further upstream also benefits in cancelling out that drone frequency earlier in the system, preventing it from resonating the full length of your exhaust.

Placement further downstream in the exhaust path will target higher RPM frequencies and overall decibel reduction. This is the typical placement for most larger body mufflers.

Spacing

When you have a long length of exhaust tubing, typically more than 5 feet, without a sound attenuating device, there is an opportunity for exhaust pulse wave to resonate, creating drone at specific RPM intervals. Typically, OEMs do a good job of placing stock resonators in the right location.

Notes

Warranty Policy

All Vibrant Performance products are covered by a LIMITED warranty covering only defects in materials and workmanship (coverage periods vary according to product category). The products supplied by Vibrant Performance must be installed in a manner that protects such product from external or internal physical damage and must be installed in accordance with catalog recommendations. Vibrant Performance cannot be held liable for product failure caused by improper installation and / or improper handling.

The sole obligation of Vibrant Performance will be to repair or replace the defective product after inspection by a Vibrant Performance Representative. The Vibrant Performance warranty makes absolutely NO ALLOWANCE for labor claims. We will not be responsible for any costs incurred to remove the defective product or to re-install the replacement product, nor does this limited warranty cover the costs to repair any damage sustained to the motor, vehicle, or any parts on the vehicle which may have been caused by the defective product. The warranty limits liability to the replacement or repair of the defective product only.

No warranty claim shall be valid without a written request for a "Returned Goods Authorization" (RGA) number. Any product returned to Vibrant for warranty reasons without an RGA # will be refused and returned to sender.
