

HIGH TEMP
ZyClear™
Clear Gloss Coating

for all
Automotive Engine
Components

Game Changing
performance at extreme
high temperatures!

Game Changing

High Temp ZyClear™ is truly the first clear coating in the automotive industry that maintains its gloss at extreme temperatures!

- **Maintains performance at extreme automotive high temperatures.**
- **Standalone application on all engine components.**
- **Applies to most stainless, chrome, painted and powdercoated surfaces.**
- **Adheres extremely well to most non silicone-based powder coatings.**
- **Use as Gloss topcoat over ZyBar™ high temp coatings.**
- **Full cure at room temperature in 60 minutes!**

ZyClear™ is the newest product in a full line of underhood and under car thermal insulating coatings for the automotive aftermarket.
